Wang,B. Goertzel,S. Franklin,2008-02-18 The field of Artificial Intelligence AI was initially directly aimed at the construction of thinking machines that is computer systems with human like general intelligence But this task proved more difficult than expected As the years passed AI researchers gradually shifted focus to producing AI systems that intelligently approached specific tasks in relatively narrow domains In recent years however more and more AI researchers have recognized the necessity and the feasibility of returning to the original goal of the field Increasingly there is a call to focus less on highly specialized narrow AI problem solving systems and more on confronting the

difficult issues involved in creating human level intelligence and ultimately general intelligence that goes beyond the human level in various ways Artificial General Intelligence AGI as this renewed focus has come to be called attempts to study and reproduce intelligence as a whole in a domain independent way Encouraged by the recent success of several smaller scale AGI related meetings and special tracks at conferences the initiative to organize the very first international conference on AGI was taken with the goal to give researchers in the field an opportunity to present relevant research results and to exchange ideas on topics of common interest In this collection you will find the conference papers full length papers short position statements and also the papers presented in the post conference workshop on the sociocultural ethical and futurological implications of AGI   *Advanced Agent Technology* Francien Dechesne,Hiromitsu Hattori,Adriaan ter Mors,Jose Miguel Such,Danny Weyns,Frank Dignum,2012-01-10 This book constitutes the thoroughly refereed post workshop proceedings of 5 workshops held at the 10th International Conference on Autonomous Agents and Multiagent Systems AAMAS 2011 in Taipei Taiwan May 2 6 2011 The 37 revised full papers presented together with 1 invited paper were carefully reviewed and selected from numerous submissions The papers are organized in sections on the workshops Agent Based Modeling for Policy Engineering AMPLE Agent Oriented Software Engineering AOSE Autonomous Robots and Multirobot Systems ARMS Data Oriented Constructive Mining and Multi Agent Simulation Massively Multi Agent Systems Models Methods and Tools DOCM3AS and Infrastructures and Tools for Multiagent Systems ITMAS   Engineering Multi-Agent Systems Natasha Alechina,Matteo Baldoni,Brian Logan,2022-03-09 This book constitutes revised selected papers from the 9th International Workshop on Engineering Multi Agent Systems EMAS 2021 which was held during May 3 4 2021 The conference was initially planned to take place in London UK but changed to an online event due to the COVID 19 pandemic The 20 full papers and 1 short paper included in this volume were carefully reviewed and selected from a total of 27 submissions The contributions deal with agent oriented software engineering programming multi agent systems declarative agent languages and technologies artificial intelligence and machine learning   *Agent and Multi-Agent Systems: Technologies and Applications* Anne Hakansson,Ronald Hartung,2009-05-25 This book constitutes the proceedings of the Third International Symposium on Agent and Multi Agent Systems Technologies and Applications held in Uppsala Sweden during June 3 5 2009 The 86 papers contained in this volume were carefully reviewed and selected from numerous submissions There are 13 main tracks covering the methodology and applications of agent and multi agent systems and 8 special sessions on specific topics within the field The papers are divided in topical sections on social and organizational structures of agents negotiation protocols mobile agents and robots agent design and implementation e commerce simulation systems and game systems agent systems and ontologies agents for network systems communication and agent learning systems Web services and semantic Web self organization in multi agent systems management and e business mobile and intelligent agents for networks and services engineering interaction protocols agent based simulation decision making and
