Nonprojecting Words A Case Study Of Swedish Particles:

Non-Projecting Words I. Toivonen, 2012-12-06 Focusing primarily on Swedish a Germanic language whose particles have not previously been studied extensively this study develops a theory of non projecting words in which particles are morphologically independent words that do not project phrases It identifies the violations of the basic tenets of X bar theory and develops a formally explicit revision of X bar theory that can accommodate the requisite weak projections Journal of Linguistics ,2016 *The Synchronic and Diachronic Syntax of the English Verb-particle Combination* Marion Elenbaas, 2007

Scandinavica Elias Bredsdorff, 2004 Copular Sentences in Russian Asya Pereltsvaig, 2007-04-06 This book provides a detailed study and a novel Minimalist account of copular sentences in Russian focusing on case marking alternations nominative vs instrumental and drawing a distinction between two types of copular sentences On the assumption that Merge is defined in the simplest way possible it is argued that not all syntactic structures are anti symmetrical One of the copular sentence types is analyzed as a poster child for symmetrical structures while the other type is treated as asymmetrical The originality of this study lies in treating the copula in the two types of copular sentences neither as completely identical nor as two distinct lexical items instead the two types of copula are derived through the process of semantic bleaching Furthermore it is argued that the two types of the copula need to combine with post copular phrases of different categories It is concluded that Russian draws a distinction between saturated DPs and unsaturated NPs in spite of its renowned lack of overt articles

Resumption as Resource Management Ash Asudeh, 2004 *Constructions and Language Change* Alexander Bergs, Gabriele Diewald, 2008 Studies in diachronic linguistics increasingly acknowledge that linguistic change is highly context dependent and somehow tied to constructions as linguistic units This is the first volume to investigate the role of constructions and the potential of constructional approaches in linguistic change The contributions in this volume comprise both theoretical and empirical studies all of which are accessible for a general audience While some contributions explicitly aim at comparing and unifying concepts from both traditional grammatical theories and recent construction grammar approaches others offer detailed case studies of exemplary problems from a constructional point of view The papers offer a cross linguistic perspective and deal with a number of different language families ranging from Germanic to Austronesian
