Nonstandard Collection Management:

Non-standard Collection Management M. Pearce,2018-11-09 First published in 1992 this volume recognises that it is not unusual when practising librarianship to come across small to medium collections within the library which because they are different from the main collection are outside the librarian s experience or are a new type of material not properly managed or exploited Therefore this volume contains chapters on a range of materials which are united by a certain rarity in the experience of most librarians It is aimed at those who need to know how to progress from scratch with a collection but not necessarily to take it into complete specialization There is information about characteristics of each type of material as well as guidance for their management Lists of further reading are provided and a note of some important collections

Collections Management as Critical Museum Practice Cara Krmpotich,Alice Stevenson,2024-07-22 There is a common misconception that collections management in museums is a set of rote procedures or technical practices that follow universal standards of best practice This volume recognises collections management as a political critical and social project involving considerable intellectual labour that often goes unacknowledged within institutions and in the fields of museum and heritage studies Collections Management as Critical Museum Practice brings into focus the knowledges value systems ethics and workplace pragmatics that are foundational for this work Rather than engaging solely with cultural modifications such as Indigenous care practices the book presents local knowledge of place and material which is relevant to how collections are managed and cared for worldwide Through discussion of varied collection types management activities and professional roles contributors develop a contextualised reflexive practice for how core collections management standards are conceptualised negotiated and enacted Chapters span national museums in Brazil and Uganda to community led heritage work in Malaysia and Canada they explore complexities of numbering digitisation and description alongside the realities of climate change global pandemics and natural disasters The book offers a new definition of collections management travelling from what is done to care for collections to what is done to care for collections and their users Rather than use being an end goal it emerges as a starting point to rethink collections work *Holistic Active Management of Non-Performing Loans* Claudio Scardovi,2015-11-05 This book discusses the most critical issues relating to the recovery of bad loans a major problem that European banks urgently need to address and resolve The book describes in an innovative but also pragmatic way the new approaches techniques and models for optimal management of non performing loans NPLs and the maximization of their recovery value Drawing on a rigorous academic background and the latest real life experiences of major European banks it details a novel means of dealing with NPLs based on velocity the holistic use of tools and accelerators and the active management of collaterals Also there is a specific focus on the smart use of big data and on the development of bad banks at both the single bank and the system wide level Ultimately credit workout is defined as a core capability for any competitive bank and as a quite interesting business opportunity for independent specialized alpha players Information Technology
