Uranium Chetan Bisariya, 1982 Civil Defense Begins at Home Laura McEnaney, 2020-10-06 Dad built a bomb shelter in the backyard Mom stocked the survival kit in the basement and the kids practiced ducking under their desks at school This was family life in the new era of the A bomb This was civil defense In this provocative work of social and political history Laura McEnaney takes us into the secretive world of defense planners and the homes of ordinary citizens to explore how postwar civil defense turned the front lawn into the front line The reliance on atomic weaponry as a centerpiece of U S foreign policy cast a mushroom cloud over everyday life American citizens now had to imagine a new kind of war one in which they were both combatants and targets It was the Federal Civil Defense Administration s job to encourage citizens to adapt to their nuclear present and future As McEnaney demonstrates the creation of a civil defense program produced new dilemmas about the degree to which civilian society should be militarized to defend itself against internal and external threats Conflicts arose about the relative responsibilities of state and citizen to fund and implement a home front security program The defense establishment s resolution was to popularize and privatize military preparedness The doctrine of self help defense demanded that citizens become autonomous rather than rely on the federal government for protection Families would reconstitute themselves as paramilitary units that could quash subversion from within and absorb attack from without Because it solicited an unprecedented degree of popular involvement the FCDA offers a unique opportunity to explore how average citizens community leaders and elected officials both participated in and resisted the creation of the national security state Drawing on a wide variety of archival sources McEnaney uncovers the broad range of responses to this militarization of daily life and reveals how government planners and ordinary people negotiated their way at the dawn of the atomic age Her work sheds new light on the important postwar debate about what total military preparedness would actually mean for American society

Solar Energy, Technology Policy, and Institutional Values Frank N. Laird, 2001-03-26 Energy policies that promote new technologies and energy sources are policies for the future They influence the shape of emergent technological systems and also condition our social political and economic lives Solar Energy

Technology Policy and Institutional Values demonstrates the difficulties of deliberating such properties by providing a historical case study that analyses US renewable energy policy from the end of World War II through the energy crisis of the 1970s. The book illuminates the ways beliefs and values come to dominate official problem frames and get entrenched in institutions. In doing so it also explains why advocates of renewable energy have often faced ideological opposition and why policy makers fail to take them seriously.

Pragmatic Perspectives on Language and Linguistics Volume II Iwona Witczak-Plisiecka, 2013-01-16. Pragmatics of Semantically Restricted Domains, the second volume of *Pragmatic Perspectives on Language and Linguistics* edited by Iwona Witczak-Plisiecka, gathers papers which partly complement and develop the first volume *Speech Actions in Theory and Applied Studies* (Cambridge Scholars Publishing, 2010). Most of the texts collected in this book are representative of advanced independent research and that of an informed exercise in the application of a pragmatic framework. They result from the Fourth Symposium on New Developments in Linguistic Pragmatics organized at the University of Łódź in May 2008. Accepting the inevitable failure of any attempt to pose a strict and clear cut division between the research area of semantics and that of pragmatics, the volume focuses on pragmatics-oriented analyses of data which are best described as semantically limited. While Volume One concentrated on speech as a type of action, the present volume, without denying the inherently actional nature of language use, concentrates on limited contexts. Pragmatic phenomena in semantically restricted domains are addressed from a variety of both theoretical and applied perspectives. The book is divided into three parts. Part One, *Pragmatics, Politics and Ideology*, gathers seven papers centered on issues pertaining to political linguistics. In Part Two, *The Pragmatics of Humour, Power and the Media*, there are eight papers which explore issues of politeness and modesty, pragmatic aspects of mediated and gendered discourse or the dynamicity of power relations in interaction. Part Three, *Focus on Textual Properties*, concentrates on text, excluding political discourse. It integrates discussions of equivalence and specialized translation, intertextual properties and pragmatically motivated lexical choices in business communication, in law and in science.

Selling Air Power Steve Call, 2009-03-01. In *Selling Air Power*, Steve Call provides the first comprehensive study of the efforts of post-war air power advocates to harness popular culture in support of their agenda. In the 1940s and much of the 1950s, hardly a month went by without at least one blatantly pro-air power article appearing in general interest magazines. Public fascination with flight helped create and sustain exaggerated expectations for air power in the minds of both its official proponents and the American public. Articles in the *Saturday Evening Post*, *Reader's Digest* and *Life* trumpeted the secure future assured by American air superiority. Military figures like Henry H. Arnold and Curtis E. LeMay, radio-television personalities such as Arthur Godfrey, cartoon figures like Steve Canyon and actors like Jimmy Stewart played key roles in the unfolding campaign. Movies like *Twelve O'Clock High*, *The Court Martial of Billy Mitchell* and *A Gathering of Eagles* projected onto the public imagination vivid images confirming what was coming to be the accepted wisdom that America's safety against the Soviet threat could best be guaranteed by air power coupled with nuclear capability.

But as the Cold War continued and the specter of the mushroom cloud grew more prominent in American minds another more sinister interpretation began to take hold Call chronicles the shift away from the heroic patriotic posture of the years just after World War II toward the threatening even bizarre imagery of books and movies like *Catch 22* *On the Beach* and *Dr Strangelove* Call's careful analysis goes beyond the public relations campaigns to probe the intellectual climate that shaped them and gave them power *Selling Air Power* adds a critical layer of understanding to studies in military and aviation history as well as American popular culture
