Alibali,2018-12-17 The book synergizes research on number across two disciplines mathematics education and psychology The underlying

problem the book addresses is how the brain constructs number The opening chapter frames the problem in terms of children's activity including mental and physical actions Subsequent chapters are organized into sections that address specific domains of number natural numbers fractions and integers Chapters within each section address ways that children build upon biological primitives e.g. subitizing and prior constructs e.g. counting sequences to construct number The book relies on co-authored chapters and commentaries at the end of each section to create dialogue between junior faculty and senior researchers as well as between psychologists and mathematics educators The final chapter brings this work together around the framework of children's activity and additional themes that arise in the collective work The book is aimed to appeal to mathematics educators mathematics teacher educators mathematics education researchers educational psychologists cognitive psychologists and developmental psychologists

Environmental Policy, Assessment and Communication David Canter, Martin Krampen, David Stea, 2024-11-07 Originally published in 1988 reissued now with a new series introduction Environmental Policy Assessment and Communication was the second in a trilogy of books to open the series Ethnoscapes Current Challenges in the Environmental Social Sciences These three titles brought together specially commissioned contributions that cover much of the range of topics that the series as a whole would cover Although the following volumes would not have the same format the opening trilogy gave an overview of what was to come while also providing a broad base for the future authors to build upon This volume has a practical orientation Its contributions deal directly with research on those environmental matters on which government agencies and other organisations formulate policies or develop design strategies This therefore covers the assessment and evaluation of designs and design proposals as well as background research to policy issues
