**The Re-Enchantment of the West, Vol 2** Christopher Partridge, 2006-04-20 The Re Enchantment of the West challenges those theories that predict widespread secularization beyond traditional institutional religiosity Spiritualities are emerging that are not only quite different from the those forms of religion that are in decline but are often defined over against them and articulated and passed on in ways quite different from those of traditional religion In particular it is argued that such contemporary Western spirituality is fed by a constantly replenished reservoir of ideas practices and methodologies which is here termed occulture Moreover such occultural ideas both feed into and are resourced by popular culture Indeed popular occulture is a key feature of the re enchantment of the West Demonstrating the significance and ubiquity of these ideas this book examines for example healthcare and nursing contemporary environmentalism psychedelia and drug use the Internet and cyberspirituality belief in UFOs and extraterrestrial life demonology and the contemporary fascination with the figure of Satan the heavy metal subculture popular apocalypticism and millennial violence

Adverse Drug Effects Jennifer Kelly, 2006-02-03 This practical guide to pharmacology is unusual in its approach Instead of examining the normal effects of drugs this book looks at the adverse effects With the advent of nurse prescribing it is essential that nurses are familiar with the common adverse effects how to recognise them and how to deal with them The book is divided into three sections The first examines the pharmacology of drugs i e what the body does to drugs pharmacokinetics what the drugs do to the body pharmacodynamics and how adverse reactions can result from these two processes Section two looks at putting the scientific knowledge into action through an examination of nurse administration and prescribing drug development and the issue of patient compliance and empowerment Section three consists of twelve case studies which describe various scenarios in which there have been adverse drug effects Throughout the book concepts are explained using examples so that the nurse can relate the concept of adverse effect to the drugs she is familiar with

**The Re-Enchantment of the West** Christopher Partridge, 2005-03-04 As a book about emergent spirituality in the contemporary West it focuses on the nature evolution and significance of new forms of religion and alternative spiritualities Part One of the book provides the theoretical background and guides the reader

through some of the principal debates After an overview of the secularization thesis which argues that the West is becoming increasingly disenchanted the second chapter turns to the sociological analysis of new religions and alternative spiritualities Particular attention is given to the ideas of the sociologist of religion Ernst Troeltsch especially his enigmatic analysis of the emergence mystical religion which presciently provides helpful insights into understanding the contemporary alternative religious milieu Against sociologists such as Bryan Wilson and Steve Bruce this and the subsequent chapter argues that rather than being insignificant new forms of spirituality are actually proving to be a significant part of Western re enchantment Chapter 3 constructs a general theory of the re enchantment of the West Chris Partridge argues that Western Society is permeated by a broad occulture by which he means a reservoir of ideas beliefs theories and practices to which new religions unorthodox spiritualities film and popular music all draw attention This re enchantment of the West should not be seen as a superficial secondary development in the shadow of Christianity In many ways it is a religious phenomenon in its own right Partridge s arguments in this regard are well put and I warmly welcome this timely book Mikhael Rothstein University of Copenhagen Denmark
