Accompanying interactive CD-ROM contains an audio pronunciation guide, NCLEX-style questions, critical thinking review, animation. **The Role of Companion Animals in Counseling and Psychology** Jane K. Wilkes, 2009. The human health benefits derived from relationships with companion animals has attracted an abundance of scientific interest and research. However, there is a need for theoretical conceptualizations in order to understand the healing benefits of human-animal interactions. The goal of this book is to seek these answers and the *OC* how *OCO* and *OC* why *OCO* companion animals play a role in counseling and psychology. In-depth, semi-structured interviews were conducted with three psychologists who use animals in their therapy settings. The focus of these interviews was to determine the experiences of having a companion animal present during therapy sessions. The results revealed that pets in therapy: 1. enhanced the therapeutic alliance relationship; 2. revived the therapeutic environment; 3. improved professional practice; and 4. created a sense of sacredness. The therapy animals seemed to provide the trust and safety needed for clients to work within the transitional space, and that the animals may act as transitional objects for some clients. This book suggests that therapy animals are extremely helpful in providing a sense of safety for traumatized clients and could act as catalysts, especially with defensive and/or detached clients. Unique features include discussion of the domestication of companion animals, research into the human-animal bond, social and psychological support theory, descriptions of methods used, object relations theory, and Winnicott's Concepts, implications for the practice of counseling and psychology, professional and ethical considerations, and suggestions for future research. Replete with informative appendices that will serve as valuable knowledge, this book is a significant resource on the subject of animal-assisted therapy for mental health professionals such as counselors, clinical social workers, psychologists, and skilled therapists. *Nursing World*, 1928
