Eye, Ear, Nose, and Throat Nursing (Classic Reprint) Achilles Edward Davis, 2016-12-06. Excerpt from Eye Ear Nose and Throat Nursing. While this little book has been written primarily for the use of nurses, students and general practitioners will we believe find it of great assistance to them also. It is not a treatise in any sense of the word but is meant simply as a guide for the intelligent care and nursing of the various diseases of the eye, ear, nose and throat and to instruct the nurse as to her exact duties during and following operations upon these organs. Antisepsis and asepsis have received particular attention since above all the nurse should know the all importance of surgical cleanliness. The methods of preparing the numerous antiseptic and sterile solutions and dressings have been given in detail while the various remedies required in the treatment and nursing of these special organs their preparation, sterilization and exact method of application have been considered fully and most carefully. In fact we have endeavored to show the nurse how to do things and correctly because in treating such delicate organs as the eye, ear, nose and throat the good results obtained depend fully as much upon the intelligent and painstaking care of the nurse as upon the work of the physician himself.
