Liminality in Tourism Robert S. Bristow, Ian Jenkins, 2021-09-05 Liminality is not typically associated with tourism even though it can be viewed as an intrinsic element of the social cultural experiences of tourism *Liminality in Tourism Spatial and Temporal Considerations* aims to build upon the tradition of liminality as expounded in social and anthropological disciplines elaborating on the theoretical principles and concepts found within certain aspects of the tourist journey and tourist product The emergence of post modern society has impelled a change in the tourist gaze towards a more experiential and adventuresome globalised experience An important aspect of the tourist phenomenon of liminality is where a transformative experience is triggered by entering a liminoid tourist space leaving the tourist permanently psychologically transformed before returning to normalised society The narrative provides a new perspective on the tourist experience with a provocative examination into the multidimensional aspects of tourism by exploring tourism within the spatial and temporal aspects of liminal landscapes Covid 19 has further changed the rubric of tourism Until the current pandemic tourism has basically been a fun experience In a post pandemic world however the tourist is now facing an unknown future which will almost certainly affect tourism liminality This book presents the reader with a wealth of examples and case studies closely illustrating the association between tourism and liminal experiences The geographical perspectives explore the more subconscious outcomes of destination and tourist product consumption The book should be a useful reader to tourism geography where the theory of liminality can be synthesized into tourist experiences The chapters in this book were originally published as a special issue of the journal *Tourism Geographies*

Dialogue and the New Cosmopolitanism Fred Dallmayr, 2022-11-28 Dialogue and the New Cosmopolitanism: Conversations with Edward Demenchonok stands in opposition to the doctrine that might makes right and that the purpose of politics is to establish domination over others rather than justice and the good life for all. In the pursuit of the latter goal, the book stresses the importance of dialogue with participants who take seriously the views and interests of others and who seek to reach a fair solution. In this sense, the book supports the idea of cosmopolitanism, which by contrast to empire involves multi-lateral cooperation and thus the quest for a just cosmopolis. The international contributors to this volume, with their varied perspectives, are all committed to this same quest. Edited by Fred Dallmayr, the chapters take the form of conversations with Edward Demenchonok, a well-known practitioner of international and cross-cultural philosophy. The conversations are structured in parts that stress the philosophical, anthropological, cultural, and ethical dimensions of global dialogue. In our conflicted world, it is inspiring to find so many authors from different places agreeing on a shared vision. Personality, Identity, and Character Darcia Narváez, Daniel K. Lapsley, 2009-06-29 This edited volume features cutting-edge work in moral psychology by pre-eminent scholars in moral self-identity, moral character, and moral personality. **Cognition, Literature, and History** Mark J. Bruhn, Donald R. Wehrs, 2013-11-26 Cognition, Literature, and History models the ways in which cognitive and literary studies may collaborate and thereby mutually advance. It shows how understanding of underlying structures of mind can productively inform literary analysis and historical inquiry and how formal and historical analysis of distinctive literary works can reciprocally enrich our understanding of those underlying structures. Applying the cognitive neuroscience of categorization, emotion, figurative thinking, narrativity, self-awareness, theory of mind, and wayfinding to the study of literary works and genres from diverse historical periods and cultures, the authors argue that literary experience proceeds from, qualitatively heightens, and selectively informs and even reforms our evolved and embodied capacities for thought and feeling. This volume investigates and locates the complex intersections of cognition, literature, and history in order to advance interdisciplinary discussion and research in poetics, literary history, and cognitive science. The Psychology of the Armenian Genocide George Green, 2025-02-25 This book examines the radicalization of beliefs, tactics, and oppression by a dominant governing group when faced with a subordinate group's historic quest for basic human rights dating back for five centuries. A unique approach: an analysis of archival documents, including minutes of Turkish meetings, provides a window into the inner workings and decision-making of the leaders. Their persuasive propaganda campaign is

demystified by applying contemporary social psychological research to identify and explain their use of psychological mechanisms to weaponize intergroup prejudice and exclusionary ideology Social antagonistic traits of the leader s ideology dark personality traits and propensity for moral disengagement are readily apparent in their highly effective propaganda campaign to gain the necessary support from their party and Turkish civilians for their genocidal agenda The Psychology of the Armenian Genocide will appeal to scholars and students alike interested in better understanding how a nation of people can be manipulated to support the annihilation of subordinate groups It will also appeal to a much wider range of people who would be interested in better understanding the manipulation of beliefs and morality to create intergroup divisions and intolerance for cooperation The Disabled Contract Jonas-Sébastien Beaudry,2021-03-18 Beaudry shows how the social contract fails to take account of the moral status of people with severe intellectual disabilities Framing the Rhetoric of a Leader M. Degani,2015-01-04 Based on a selection of 30 election campaign speeches during Obama s first run for the American presidency in 2008 this book investigates the Democratic presidential candidate s much celebrated rhetoric from a cognitive semantics point of view
