**Food Factors** Hajime Ohigashi, 2000 The text covers research on food factors of a variety of physiological significance. The actual goal is to establish a role of food factors in disease prevention and health promotion from the scientific base. The two volumes present research data and reviews by numerous experts and should be of special interest and relevance to all who are concerned with food factors in disease prevention and health promotion. Topics covered include cancer prevention and those in antioxidants as well as vitamin E, minerals and trace elements, peptide and amino acids, flavones and flavonols, isoflavones, dietary fibers, oligo and polysaccharides, lipids, catechins, carotenoids, polyphenols, terpenoids and sulfur containing compounds. *The Nidoviruses* Ehud Lavi, Susan R. Weiss, Susan T. Hingley, 2012-12-06 In 1996 the International Committee for Taxonomy of Viruses (ICTV) recognized the name Nidovirales as the formal name for Coronaviridae and Arteriviridae. In recognition of this change and in response to the wishes of our colleagues, we named this meeting for the first time The International Symposium of Nidoviruses. The meeting in the wooded environment of Lake Harmony, Pennsylvania, provided a stimulating opportunity for assessing the progress made in the field since the last meeting in Segovia, Spain, in 1997. Over 150 scientists from academia and industry attended the meeting. The meeting hosted senior members of the Nidovirus community, some of whom have been studying the subject for over 20 years, as well as younger scientists, the next generation of Nidovirologists. The traditional informal format, the shared meals, the social activities, and the relatively inexpensive venue made the meeting a popular adventure. In her opening remarks, Susan Weiss showed pictures from previous meetings, reminding us how young we used to look. Neal Nathanson was our keynote speaker at the opening night, giving an overview on how viral pathogenesis studies helped in shaping the evolution of viral research and vaccine development. The scientific program of the meeting was divided into 9 sessions, including 10 keynote presentations. The meeting opened with a session on epidemiology, evolution, and genome structure. Sasha Gorbalenya shared with us insights gained from comparative sequence analysis, emphasizing the unifying traits among nidoviruses but also pointed out the remaining black holes.

**Cancer and the Search for Selective Biochemical Inhibitors** E.J. Hoffman, 2007-06-25 The world of medicine has become splintered into two factions: that of orthodoxy and its counterpart, alternative or complementary medicine. A problem with alternative medicine is, of course, that of anecdote and hearsay. The solution, the disclosure in an unassailable fashion of the underlying biochemical principles for alternative cancer therapies.
