Wound Healing Joseph M McCulloch,Luther C Kloth,2010-07-01 This most complete resource is back in a full color thoroughly revised updated and

significantly expanded 4th Edition that incorporates all of the many scientific and technological advances that are changing the scope of practice in this multidisciplinary field. Learned authors Joseph McCulloch and Luther Kloth have gathered world renowned experts in wound management to present a comprehensive text that is evidence based, clinically focused and practical. Responding to the ever changing field of wound management the 4th Edition is far from a simple update; it is virtually a brand new text. The committed and respected teams of authors and contributors have broadened the scope of this text and expanded it from 14 to 35 chapters.

Treating the Traumatized Child Scott Sells, Ellen Souder, 2017-12-15. This book builds upon my early work and the work of others by offering a comprehensive guide to practitioners interested in facing and helping to heal trauma and manage the drama systemically, with a special focus on children and adolescents. The FST Model is a contribution to the fields of trauma, family sciences and human development practice. Charles R. Figley, PhD, Kurzweg Chair in Disaster Mental Health at Tulane University in New Orleans. This is the first book that addresses trauma treatment for child and adolescents using a Family Systems Trauma (FST) model which goes beyond individual therapy to include the child and their entire family. Co-written by a renowned family therapist who created the Parenting with Love and Limits model, it delivers a research-based step by step approach that incorporates the child's immediate family along with their extended family to treat the traumatized child or adolescent. Using a stress chart, the child or adolescent's trauma symptoms are quickly identified. This strategy guides therapists in accurately diagnosing root causes of the child's trauma and culminates in the creation of co-created wound playbooks to heal trauma in both the child as well as other family members. Additional helpful features include extensive case examples, a menu of trauma techniques, wound playbook examples, evaluation forms, client handouts and other practical tools to provide the therapist with a complete guide to implementing this approach. Child and family therapists, social workers, mental health counselors and psychologists working in a variety of settings will find this book a valuable resource.

Key Features: Provides a step by step practice focused time limited model. Uses a family systems approach for addressing child and adolescent trauma. The only book of its kind. Includes useful tools such as checklists, client handouts and evaluation forms.
