Hmong American Concepts of Health, Healing, and Conventional Medicine Dia Cha,2003 America s healthcare system in the twenty first century faces a variety of pressures and challenges not the least of which is that posed by the increasingly multicultural nature of American society itself Large numbers among the Hmong immigrants from the landlocked Asian

nation of Laos continue to prefer their own ancient medical traditions That these Hmong Americans should continue to adhere to a tradition of folk medicine rather than embrace the modern healthcare system of America poses questions that must be answered This book takes up the task of examining Hmong American concepts of health illness and healing and looks at the Hmong American experience with conventional medicine In so doing it identifies factors that either obstruct or enable healthcare delivery to the Hmong specifically a target sample of Hmong Americans resident in Colorado Drawing upon scientific methods of data collection the research reveals attitudes currently held by a group of American citizens toward health and medicine which run the gamut from the very modern to those which have prevailed in the highlands of Southeast Asia for centuries

Health, Healing, and Religion David R. Kinsley,1996 Explicitly dealing with the religious aspects of healing and healers this unique and intriguing book examines illness healing and religion in cross cultural perspective by looking at how sickness is understood and treated in a wide variety of cultures Centered around three principle themes the text A illustrates how crucial it is to frame illness in a meaningful context in every culture and how this process is almost always bound up with religious spiritual and moral concerns B shows how many beliefs strategies and practices that characterize traditional cultures also appear in Christianity putting healing in the Christian tradition in a broad rational context and C discusses the continuities between traditional explicitly religious and modern medical cultures demonstrating that many features of modern scientific medicine are symbolic and ritualistic and that many aspects and practices of modern medicine are similar to healing as seen in traditional pre scientific medical cultures For those in the religious anthropological and medical professions
