This book is for the reader who takes interest in an age old issue that remains contemporary with every succeeding generation When how and why we are here are questions that have caused countless generations of thinkers and laymen alike to intuitively seek at the very least the semblance of an answer to questions that have become more of an outlook than a science and in turn spring up among the problems of modern life as opposed to allowing for a resolution to that which was intended to clarify instead of further complicate Free from the shackles and bias imposed by the various schools of religious scientific and philosophical thought the examinations offered herein are rooted in systematic analyses of the scientific philosophical ethical social and finally the religious which in turn allows for the explanation and justification of concepts that enable the reader to adopt a perspective relevant to the distinctions of absolute truth and relativistic assumptions Our age is accurately referred to as the age of advancement and technology and for good reason The rapid pace of progression over the last century in the life sciences has contributed to a broadened understanding of knowledge itself and its relation to the psychological and sociological aspects of our existence As a result of the significant expansion of the sciences the desire for an understanding of self and simply of why has in many ways been diluted thus negating the never ending questions that

once tugged at man's conscious in the middle of the night for thousands of years Today's amazing achievements have laid the foundation for a whole series of newer problems and questions that threaten mankind as never before The medical and biological sciences have enabled us to have a life expectancy beyond that of prior generations however coupled with that are the problems of population explosion which in the not too distant future will give rise to serious concerns We have the ability to harness the power of the atom yet along with it comes the ability to destroy all that we hold sacred Taking into consideration the advanced age we live in how does one account for the remarkable complexity extant throughout the known universe Is one to assume that our consciousness coupled with our overwhelming sense of purpose can be attributed solely to random chance alone The law of causation deals with the need for a preceding event leading to the outcome and despite the fact that this scientific age has left its handprint on every facet of life today it has failed to satisfy the innate question of simply why

Liberation From Life's Shadows J. Maurus, 2001

The Glass Church Mark T. Mulder, Gerardo Martí, 2020-04-17

Robert H Schuller's ministry including the architectural wonder of the Crystal Cathedral and the polished television broadcast of Hour of Power cast a broad shadow over American Christianity Pastors flocked to Southern California to learn Schuller's techniques The President of United States invited him sit prominently next to the First Lady at the State of the Union Address Muhammad Ali asked for the pastor's autograph It seemed as if Schuller may have started a second Reformation And then it all went away As Schuller's ministry wrestled with internal turmoil and bankruptcy his emulators including Rick Warren Bill Hybels and Joel Osteen nurtured megachurches that seemed to sweep away the Crystal Cathedral as a relic of the twentieth century How did it come to this Certainly all churches depend on a mix of constituents charisma and capital yet the size and ambition of large churches like Schuller's Crystal Cathedral exert enormous organizational pressures to continue the flow of people committed to the congregation to reinforce the spark of charismatic excitement generated by high profile pastors and to develop fresh flows of capital funding for maintenance of old projects and launching new initiatives The constant attention to expand constituencies boost charisma and stimulate capital among megachurches produces an especially burdensome strain on their leaders By orienting an approach to the collapse of the Crystal Cathedral on these three core elements constituency charisma and capital The Glass Church demonstrates how congregational fragility is greatly accentuated in larger churches a notion we label megachurch strain such that the threat of implosion is significantly accentuated by any failures to properly calibrate the inter relationship among these elements

PTL John Wigger, 2017-07-06 In 1974 Jim and Tammy Bakker launched their television show the PTL Club from a former furniture store in Charlotte N C with half a dozen friends By 1987 they stood at the center of a ministry empire that included their own satellite network a 2300 acre theme park visited by six million people a year and millions of adoring fans The Bakkers led a life of conspicuous consumption perfectly aligned with the prosperity gospel they preached They bought vacation homes traveled first class with an entourage and proclaimed that God wanted everyone to be healthy and wealthy When it all fell apart after revelations of a sex scandal and massive financial mismanagement all of America watched more than two years of federal investigation and trial as Jim was eventually convicted on 24 counts of fraud and conspiracy He would go on to serve five years in federal prison PTL is more than just the spectacular story of the rise and fall of the Bakkers John Wigger traces their lives from humble beginnings to wealth fame and eventual disgrace At its core PTL is the story of a group of people committed to religious innovation who pushed the boundaries of evangelical religion's engagement with American culture Drawing on trial transcripts videotapes newspaper articles and interviews with key insiders dissidents and lawyers Wigger reveals the power of religion to redirect American culture This is the story of a grand vision gone wrong of the power of big religion in American life and its limits

Never Saw It Coming Karen A. Cerulo, 2008-09-15 People especially Americans are by and large optimists They're much better at imagining best case scenarios I could win the lottery than worst case scenarios A hurricane could destroy my neighborhood This is true not just of their approach to imagining the future but of their memories as well people are better able to describe the best moments of their lives than they are the worst Though there are psychological reasons for this phenomenon Karen A Cerulo in Never Saw It Coming considers instead the role of society in fostering this attitude What kinds of communities develop this pattern of thought which do not and what does that say about human ability to evaluate possible outcomes of decisions and events

Cerulo takes readers to diverse realms of experience including intimate family relationships key transitions in our lives the places we work and play and the boardrooms of organizations and bureaucracies Using interviews surveys artistic and fictional accounts media reports historical data and official records she illuminates one of the most common yet least studied of human traits a blatant disregard for worst case scenarios *Never Saw It Coming* therefore will be crucial to anyone who wants to understand human attempts to picture or plan the future In *Never Saw It Coming* Karen Cerulo argues that in American society there is a positive symmetry a tendency to focus on and exaggerate the best the winner the most optimistic outcome and outlook Thus the conceptions of the worst are underdeveloped and elided Naturally as she masterfully outlines there are dramatic consequences to this characterological inability to imagine and prepare for the worst as the failure to heed memos leading up to both the 9 11 and NASA Challenger disasters for instance so painfully reminded us Robin Wagner Pacifici Swarthmore College Katrina 9 11 and the War in Iraq all demonstrate the costliness of failing to anticipate worst case scenarios *Never Saw It Coming* explains why it is so hard to do so adaptive behavior hard wired into human cognition is complemented and reinforced by cultural practices which are in turn institutionalized in the rules and structures of formal organizations But Karen Cerulo doesn't just diagnose the problem she uses case studies of settings in which people effectively anticipate and deal with potential disaster to describe structural solutions to the chronic dilemmas she describes so well *Never Saw It Coming* is a powerful contribution to the emerging fields of cognitive and moral sociology Paul DiMaggio Princeton University
