Introducing the Mythological Crescent Harald Haarmann,Joan Marler,2008 There is a broad cultural region with related traditions of mythical beliefs interconnected by long term contacts during prehistoric times This area called here the Mythological Crescent is a zone of cultural convergence that extends from the ancient Middle East via Anatolia to southeastern Europe opening into the wide cultural landscape of Eurasia The very old interconnections between Eurasia and Anatolia are explored in this study for the first time In a comparative view striking similarities can be reconstructed for the ancient belief systems and the imagery of both regions which suggest convergent cosmological conceptualizations of high age The beliefs and ritual practices of the indigenous peoples of Eurasia are rooted in the shamanism of the oldest cultural layers of the Palaeolithic Although socioeconomic development in Anatolia was markedly different from cultural evolution in Eurasia the hunters and gatherers in Anatolia who adopted sedentary lifeways did not entirely lose their ancient beliefs during the transition to plant cultivation in the eighth millennium BCE Archaic beliefs and imagery fused with new practices and innovations during the development of agrarian societies One diagnostic motif which was perpetuated from the Palaeolithic to the Neolithic and beyond is represented by the production of female figurines statuettes Their significance for communal life has been linked to spiritual concepts of the continuity of life the vegetation cycle and the protection of the natural habitat of all living things as recorded in myths and historical folk art of

Uralic and other peoples The bear plays a significant role as a mythical animal in the imagery of Eurasia whereas this motif was lost in Anatolia during the transition from antiquity to the Middle Ages

Erika Dyck and Chris Elcock deliberately move away from these places in this collection to reveal a longer and more global history of psychedelics which chronicles their discovery use and cultural impact in the twentieth century The authors in this collection explore everything from LSD psychotherapy in communist Czechoslovakia to the first applications of LSD 25 in South America to the intersection of modernism and ayahuasca in China Along the way they also consider how psychedelic experiments generated their own cultural expressions where the specter of the United States may have loomed large and where colonial empires exerted influence on the local reception of psychedelics in botanical and pharmaceutical pursuits Breaking new ground by adopting perspectives that are currently lacking in the historiography of psychedelics this collection adds to the burgeoning field by offering important discussions on underexplored topics such as gender agriculture parapsychology anarchism and technological innovations

Pagan Christmas Christian Rätsch, Claudia Müller-Ebeling, 2006-10-24 An examination of the sacred botany and the pagan origins and rituals of Christmas Analyzes the symbolism of the many plants associated with Christmas Reveals the shamanic rituals that are at the heart of the Christmas celebration The day on which many commemorate the birth of Christ has its origins in pagan rituals that center on tree worship agriculture magic and social exchange But Christmas is no ordinary folk observance It is an evolving feast that over the centuries has absorbed elements from cultures all over the world practices that give plants and

plant spirits pride of place In fact the symbolic use of plants at Christmas effectively transforms the modern day living room into a place of shamanic ritual Christian R tsch and Claudia M ller Ebeling show how the ancient meaning of the botanical elements of Christmas provides a unique view of the religion that existed in Europe before the introduction of Christianity The fir tree was originally revered as the sacred World Tree in northern Europe When the church was unable to drive the tree cult out of people s consciousness it incorporated the fir tree by dedicating it to the Christ child Father Christmas in his red and white suit who flies through the sky in a sleigh drawn by reindeer has his mythological roots in the shamanic reindeer herding tribes of arctic Europe and Siberia These northern shamans used the hallucinogenic fly agaric mushroom which is red and white to make their soul flights to the other world Apples which figure heavily in Christmas baking are symbols of the sun god Apollo so they find a natural place at winter solstice celebrations of the return of the sun In fact the authors contend that the emphasis of Christmas on green plants and the promise of the return of life in the dead of winter is just an adaptation of the pagan winter solstice celebration
