Anne Manne, 2015-08-03 Far from being the work of a madman Anders Breivik's murderous rampage in Norway was the action of an extreme narcissist As the dead lay around him he held up a finger asking for a Band Aid Written with the pace of a psychological thriller *The Life of I* is a compelling account of the rise of narcissism in individuals and society Manne examines the Lance Armstrong doping scandal and the alarming rise of sexual assaults in sport and the military as well as the vengeful killings of Elliot Rodger in California She looks at narcissism in the pursuit of fame and our obsession with making it She goes beyond the usual suspects of social media and celebrity culture to the deeper root of the issue how a new narcissistic character type is being fuelled by a cult of the self and the pursuit of wealth in a hypercompetitive consumer society *The Life of I* also offers insights from the latest work in psychology looking at how narcissism develops But Manne also shows that there is an alternative how to transcend narcissism to be fully alive to the presence of others how to create a world where love and care are no longer turned inward *After Darwin: Animals, Emotions, and the Mind* Angelique

Richardson, 2013-11-10 What is emotion pondered the young Charles Darwin in his notebooks How were the emotions to be

placed in an evolutionary framework And what light might they shed on human animal continuities These were among the questions Darwin explored in his research assisted both by an acute sense of observation and an extraordinary capacity for fellow feeling not only with humans but with all animal life After Darwin Animals Emotions and the Mind explores questions of mind emotion and the moral sense which Darwin opened up through his research on the physical expression of emotions and the human animal relation It also examines the extent to which Darwin s ideas were taken up by Victorian writers and popular culture from George Eliot to the Daily News Bringing together scholars from biology literature history psychology psychiatry and paediatrics the volume provides an invaluable reassessment of Darwin s contribution to a new understanding of the moral sense and emotional life and considers the urgent scientific and ethical implications of his ideas today

Dostoevskii's Overcoat: Influence, Comparison, and Transposition. Joe Andrew,Robert Reid,2013-12-23 One of the most famous quotations in the history of Russian literature is Fedor Dostoevskii s alleged assertion that We have all come out from underneath Gogol s Overcoat Even if Dostoevskii never said this there is a great deal of truth in the comment Gogol certainly was a profound influence on his work as were many others Part of this book s project is to locate Dostoevskii in relationship to his predecessors and contemporaries However the primary aim is to turn the oft quoted apocryphal comment on its head to see

the profound influence Dostoevskii had on the lives work and thought of his contemporaries and successors This influence extends far beyond Russia and beyond literature Dostoevskii may be seen as the single greatest influence on the sensibilities of the twentieth and twenty first centuries To a greater or lesser extent those concerned with the creative arts in the twentieth and twenty first centuries have all come out from under Dostoevskii s Overcoat Components of emotional meaning John J. R. Fontaine, Klaus R. Scherer, Cristina Soriano, 2013-08-01 Publications on emotion and the affective sciences in general have exploded in the last decade Numerous research teams and individual scholars from many different disciplines have published research papers or books about many different aspects of emotions and their role in behaviour and society However One aspect of emotional research that has been somewhat neglected is the way in which emotional terms translate into other languages When using terms like anger sadness fear disgust and joy for so called basic emotions as well as terms like shame guilt pride regret and contempt for more complex emotions it is naturally assumed that the emotion terms used for research in the native language of the researchers and translated into English are completely equivalent in meaning However this is not generally the case In many cases there is no direct one to one relationship between an English term and a term in an alternative language In fact there can be significant differences in the way that these seemingly similar emotional terms can be applied across various languages with important implications for how we review and appraise this work This book presents an extensive cross cultural and cross linguistic review of the meaning of emotion words adopting a novel methodological approach Based on the Component Process Model the authors developed a new instrument to assess the meaning of emotion terms This instrument the GRID questionnaire consists of a grid of 24 emotion terms spanning the emotion domain and 142 emotion features that operationalize five emotion components Appraisals Bodily reactions Expressions Action tendencies and Feelings For the operationalization of these five emotion components very different emotion models from the Western and the cultural comparative emotion literature were taken into account Components of Emotional Meaning includes contributions from psychological cultural comparative and linguistic perspectives demonstrating how this new instrument can be used to empirically study very different research questions on the meaning of emotion terms The implications of the results for major theoretical debates on emotion are also discussed For all researchers in the affective sciences this book is an important new reference work **Practicality of Grace in Protestant Theology** Michael G. The Rise of Consciousness and the Development of Emotional Life Michael Lewis,2013-10-16 Synthesizing decades of influential research and theory Michael Lewis demonstrates the centrality of consciousness for emotional development At first infants competencies constitute innate reactions to particular physical events in the child s world These action patterns are not learned but are readily influenced by temperament and social interactions With the rise of consciousness these early competencies become reflected feelings giving rise to the self conscious emotions of empathy envy and embarrassment and later shame guilt and pride Focusing on typically developing children Lewis also explores problems of atypical emotional development Winner m William James Book Award Society for General Psychology APA Division 1

Handbook of Restorative Justice , Knowing COVID-19 Fred Cooper,Des Fitzgerald,2024-05-28 Knowing COVID 19 demonstrates how researchers in the humanities shone a light on some of the many hidden problems of COVID 19 in the very depths of the pandemic crisis Drawing on eight COVID 19 research projects the volume shows how humanities researchers alongside colleagues in the clinical and life sciences addressed some of the major critical unknowns about this new infectious disease from the effects of racism to the risks of deploying shame from how to design an effective instructional leaflet to how to communicate effectively to bus passengers Across eight novel case studies the book showcases how humanities research during a pandemic is not only about interpreting the crisis when it has safely passed but how it can play a vital collaborative and instrumental role as events are still unfolding
