Shame 2the Secret:

The Secret Life of Families Evan Imber-Black,1999-09-01 Secrets come in all shapes and sizes And for families as well as individuals they are built on a complex web of shifting motives and emotions But today when personal revelations are posted on the Internet or sensationalized on afternoon talk shows we risk losing touch with how important secrets are how they are used and abused their power to harm and heal In this important work Evan Imber Black explores the nature of secrets helping us understand The distinction between healthy privacy and toxic secrecy What to tell and not to tell young children How to safely confront a family zone of silence Why adolescents need to have some secrets and where to draw the line The effect of official secrets like sealed adoption records and medical testing What to consider before revealing an important secret And much more Filled with moving first person stories The Secret Life of Families provides perspective on some of today s most sensitive personal and social issues Giving voice to our deepest fears and to our power to overcome them this is a book that will be talked about for years to come

Awakening the Dreamer Clinical Journeys Philip Bromberg continues the illuminating explorations into dissociation and clinical process begun in *Standing in the Spaces* 1998 Bromberg is among our most gifted clinical writers especially in his unique ability to record peripheral variations in relatedness those subtle split second changes that capture the powerful workings of dissociation and chart the changing self states that analyst and patient bring to the moment For Bromberg a model of mind premised on the centrality of self states and dissociation not only offers the optimal lens for comprehending and interpreting clinical data it also provides maximum leverage for achieving true intersubjective relatedness And this manner of looking at clinical data offers the best vantage point for integrating psychoanalytic experience with the

burgeoning findings of contemporary neuroscience cognitive and developmental psychology and attachment research Dreams are approached not as texts in need of deciphering but as means of contacting genuine but not yet fully conscious self states From here he explores how the patient's dreamer and the analyst's dreamer can come together to turn the real into the really real of mutative therapeutic dialogue The difficult frequently traumatized patient is newly appraised in terms of tensions within the therapeutic dyad And then there is the haunted patient who carries a sense of preordained doom through years of otherwise productive work until the analyst can finally feel the patient's doom as his or her own Laced with Bromberg's characteristic honesty humor and thoughtfulness these essays elegantly attest to the mind's reliance on dissociation in both normal and pathological variants in the ongoing effort to maintain self organization Awakening the Dreamer no less than Standing in the Spaces is destined to become a permanent part of the literature on therapeutic process and change
