Regional Community Building in East Asia Lee Lai To, Zarina Othman, 2016-09-01 This volume is a collection of papers written by nationals or former nationals of the respective country in ASEAN and Northeast Asia Unlike other works written by scholars outside ASEAN or East Asia it offers an insider s point of view of the 10 ASEAN states China Japan and South Korea on regional community building While a nationalist perspective may permeate throughout the study it is also clear that pursuing regional cooperation is considered to be important by the respective author denoting the non exclusivity between nationalism and regionalism and the mutual reinforcement of the two Each author of this volume has made a deliberate effort to introduce and survey the developmental challenges and experiences of his or her country from a historical perspective All authors without exception have emphasized the importance and advantages in staying with ASEAN or linking up with ASEAN by China Japan and South Korea in political security economic and socio cultural terms Their papers also reveal that the self help and self strengthening mechanism emphasized by the ASEAN Plus Three process will take time to bear fruits In the meantime it seems that bilateral interactions and cooperation between ASEAN and Northeast Asian states remain to be more dominant as shown in this study One can argue that bilateral interactions are the building block of multilateralism interactions To be sure there is a deliberate effort in this study to highlight unity in diversity in East Asia in general and ASEAN in particular
