McCormick, 2017-08-08 Captain Young and I for some years have been gathering material from all over the world about the Selachians the Sharks Skates Rays and their allies of which there are more than 600 known species We originally intended merely to update Captain Young's book Shark published by Gotham House in 1934 and now a collector's item but as the material ever expanded it was decided that an entirely new book covering a much broader field was needed Additional material was collected from all over the world for many years When Captain Young and I felt that the research was nearly completed we called upon Tom Allen an experienced newspaperman to aid us in transforming the research material into a book Tom and I continued the research up to and beyond the completion of the manuscript Tom also did further research and added new material in the course of writing the book In all scientific classifications the Selachians are separated clearly from the Teleosteans or Bony Fishes and there are even leading ichthyologists who do not regard the former as fishes at all but rather as representing a separate and distinct Class of animal life **Field Guide to Australian Sharks & Rays** Ross K. Daley, 2002 Australia has an extremely diverse shark and ray fauna There are more than 300 different species and at least half of these only swim in our waters This user friendly guide is for fishers scientists and observers to identify the main Australian species **Sharks, Rays, and Chimaeras of California** David Ebert, 2003-05-08 Ebert has herein assembled an enormous body of knowledge about California's 43 shark species ranging from shark and human behavior to taxonomic minutiae along with up to date explanations of their ecology status and fisheries More importantly his Herculean effort includes the often overlooked 25 species of skates rays and chimaeras That along with the fine illustrations of Mat Squillante should answer any question that a student diver natural history buff or recreational or commercial fisher might ask John E McCosker coauthor of Great White Shark The timing of this publication is ideal given the status of some of California's elasmobranch populations and the need for a deeper understanding of their biology ecology and fishery management The book is a comprehensive treatment if one wants to find out the latest information on any species of shark or ray off California this is the place to go An outstanding work Gregor M Cailliet Professor Moss Landing Marine Laboratories and Director Pacific Shark Research Center Sharks, Skates and Rays Perry W.
