Nazis, Women and Molecular Biologie Gunther Siegmund Stent, What prompts a well renowned scientist in molecular biology to write memoirs about a part of his life In the case of Gunther Stent it was not to reflect on his career as a scientist but to come to an understanding of his own soul In his seventies he had come to see that he had been throughout his life an emotional sleepwalker especially as regards women and in addition that he had been troubled by Jewish self hatred His story may have more to do with St Augustine s Confessions than with a scientist s memoirs Stent provides insight into the power of political correctness and the ability of a government to establish a perverse vision of reality For readers interested in bioethics Stent s memoirs help to explain how Germany could have been the first country to enact an all encompassing protection for human research subjects while it was also the country that produced the medical experiments of the Nazis and the greatest perversion of medical morality in history Stent is a person of intelligence and subtlety an accomplished writer a deep and wise man and a loyal friend His narrative is centered emotionally on a youth spent in Berlin in the Nazi period As a boy of fourteen he was an eyewitness of the horrors of the Kristallnacht pogrom On New Year s Eve 1938 he escaped from Germany across the green frontier He came to America in his teens only to return to Berlin at the end of World War II as a scientific consultant for the U S Military On his return to the States Stent participated in the exciting early scientific breakthroughs of molecular biology that transformed the twentieth century life sciences His *Nazis Women and Molecular Biology* is a piercing self examination and as its review in Science Newsletter says an act of self exposure abnegation contrition and expiation It will be of keen interest to those who have inhabited Stent s worlds or shared his experiences as well as those who wish to learn more about them Gunther S Stent is professor emeritus of neurobiology at the University of California Berkeley He is the author of such classic texts as *Molecular Biology of Bacterial Viruses* and *Molecular Genetics* as well as philosophical books such as *The Coming of the Golden Age* *Paradoxes of Progress* and most recently *2002 Paradoxes of Free Will*
