[Shea value chain as key pro-poor carbon-fixing engine in West Africa](#) Food and Agriculture Organization of the United Nations, Global Shea Alliance, 2020-02-07 As part of its Sustainability Program the Global Shea Alliance GSA in partnership with the Food and Agriculture Organisation of the United Nations FAO Regional Office for Africa conducted this multi impact appraisal of the shea value chain in 8 West African countries that account for 99% of shea exports The study uses the EX ACT Value Chain tool EX ACT VC developed in 2016 by

the FAO to assess the value chain's contribution to climate mitigation, climate resilience and socio-economic impact. At present, the shea value chain fixes 1.5 million tons of CO₂ every year. Relative to production volumes, every ton of shea kernels produced has a negative carbon footprint of 1.04 tons of CO₂. With an expansion strategy supported by donors and private partners to increase shea tree population in agroforestry areas by 7 million additional trees per year, the CO₂ fixed could increase up to 9 million tons of CO₂e per year, leading to an aggregated carbon fixing impact of 180 million tons of CO₂e over 20 years. Through shea parklands expansion and improvement of collector productivity, the gross income per woman collector could increase to US 167/year while the value added per day of work will reach US 2.30. The global value chain will reach a gross production value of about US 593 million, representing 6% growth per year between 2019 and 2032, and a value added of US 452 million by 2032.

The Palgrave Handbook of African Education and Indigenous Knowledge Jamaine M. Abidogun, Toyin Falola, 2020-06-02. This handbook explores the evolution of African education in historical perspectives as well as the development within its three systems: Indigenous, Islamic, and Western education models, and how African societies have maintained and changed their approaches to education within and across these systems. African education continues to find itself at once preserving its knowledge while integrating Islamic and Western aspects in order to compete within this global reality. Contributors take up issues and themes of the positioning, resistance, accommodation, and transformations of indigenous education in relationship to the introduction of Islamic and later Western education. Issues and themes raised acknowledge the contemporary development and positioning of indigenous education within African societies and provide understanding of how indigenous education works within individual societies and national frameworks as an essential part of African contemporary society.

Geografia della bellezza Barbara Bertoli, 2015-02-18T00:00:00+01:00. Per conoscere un popolo e una terra si possono scegliere molte strade, ma da sempre quella dei rituali di bellezza è la via più affascinante e diretta. Il modo in cui uomini e donne si prendono cura del loro corpo rivela molte cose sulla storia e sulle tradizioni di un Paese. L'evidenza, differenze e similitudini, evoca sensazioni e atmosfere particolarissime. In questo viaggio intorno al mondo, Barbara Bertoli, farmacista e fitoterapista, ma soprattutto esploratrice curiosa, ha deciso di immergersi nella cultura locale, lasciandosi spesso guidare da un fiore, da una pianta, da un'essenza speciale, scelte tra le più antiche e affascinanti, approfondite nel loro uso tradizionale e riproposte per essere utilizzate come ingrediente d'elezione nella cosmetica naturale. Dovunque sia stata, ha incontrato persone, ha ascoltato storie e soprattutto ha cercato di scoprire quali sono gli usi cosmetici delle materie tipiche di quei luoghi, dall'olivo della Grecia fino al bambù delle Isole Fiji, passando per trenta Paesi e cinque continenti. In queste pagine ci restituisce con uno stile evocativo, chiaro e conciso, esperienze, paesaggi, leggende e storie rielaborate grazie alle conoscenze specifiche apprese in anni di studi e viaggi.
