Evolution of Longevity in Animals Avril Woodhead, 2013-03-07 The analysis of intra group correlations between LS and BW at representative intervals yields no consistent support for the hypothesis that lower BW is associated with longer LS Indeed among male Wistar rats and C57BL 6J and A J mice followed since weaning on AL diets the data suggested that relatively higher BW across the adult LS was generally associated with longer life Even when the diet was restricted by EOD or RES regimens this pattern of positive correlations between LS and BW persisted for the C57BL 6J and A J strains when relative ages were analyzed However when BW at absolute ages were correlated with LS support for the positive relationship between BW and LS was not as forthcoming When AL groups were assessed beginning at later ages 10 months the pattern of positive correlations was very evident for the Wistar rats heavier rats tended to live longer This pattern was also evident among AL fed C57BL 6J mice followed since 6 months but was lost in the 10 month group in this strain Among A J mice on AL diets the pattern became somewhat negative when followed at 6 and 10 months of age However among both C57BL 6J and A J mice placed on EOD diets at 6 and 10 months of age the pattern clearly tended toward the positive

Longevity Imperative Andrew J. Scott, 2024-04-23 SHORTLISTED FOR THE FINANCIAL TIMES AND SCHRODERS BUSINESS BOOK OF THE YEAR A manifesto to guide the longevity revolution David Sinclair for individuals institutions and society to adapt to the reality of living longer lives Thanks to increases in life expectancy we can now expect to live for a long time Most of us would welcome an extra day in the week so why do so many of us view the prospect of additional years with fear and skepticism The reason is simple society is not currently structured to support long lives Rather than thinking in terms of the needs of a rising number of older people we must instead support the young and middle aged to prepare differently for the longer futures they can expect The Longevity Imperative outlines the innovations needed to make the most of these longer lives substantial changes to our health system economy and financial sector as well as in how we manage our careers health finances and relationships Instead of seeing longevity as a problem economist Andrew J Scott challenges us to view it as an opportunity This book charts a course to address the individual social political economic and cultural changes required so that all of us regardless of age can live lives that are not just longer but healthier happier and more productive

Understanding

Ageing Robin Holliday,1995-01-27 This book presents a completely novel approach to the understanding of ageing which many believe is an unsolved problem in biology It explains why ageing exists in animals and reviews our understanding of it at the biological level This includes a discussion of the origins and evolution of ageing The book is not a review of research on ageing but instead draws on material from a wide range of disciplines including the very extensive biomedical information about age related diseases in humans Understanding Ageing argues that much research needs to be done on the cellular and molecular aspects of ageing if the origins of these diseases are to be understood and their prevention made possible This thought provoking book will appeal to all students and researchers who are interested in ageing whether they are working in the clinical or basic research sphere
