Long Meg:

The Concept of the Goddess Sandra Billington, Miranda Green, 2002-09-11 The Concept of the Goddess explores the function and nature of goddesses and their cults in many cultures including Celtic Roman Norse Caucasian Japanese traditions The contributors explore the reasons for the existence of so many goddesses in the mythology of patriarchal societies and show that goddesses have also assumed more masculine roles with war hunting and sovereignty being equally important aspects of their cults **Cross Dressing, Sex, and Gender** Vern L. Bullough, Bonnie Bullough, 1993 Not only surveys cross dressing and gender impersonation throughout history and in a variety of cultures but examines the medical biological psychological and sociological findings that have been presented in modern scientific literature New Light on the Neolithic of Northern England Gill Hey, Paul Frodsham, 2021-01-13 These papers highlight recent archaeological work in Northern England in the commercial academic and community archaeology sectors which have fundamentally changed our perspective on the Neolithic of the area Much of this was new work and much is still not published has been overlooked in the national discourse The papers cover a wide geographical area from Lancashire north into the Scottish Lowlands recognising the irrelevance of the England Scotland Border They also take abroad chronological sweep from the Mesolithic Neolithic transition to the introduction of Beakers into the area The key themes are the nature of transition the need for a much improved chronological framework regional variation linked to landscape character links within northern England and with distant places the implications of new dating for our understanding the axe trade the changing nature of settlement and agriculture the character early Neolithic enclosures the need to integrate rock art into wider discourse *Love Disguised* Lisa Klein, 2013-07-30 Move over Shakespeare in Love Lisa Klein is back with the most romantic vision of young Shakespeare yet The Gods' Machines Wun Chok Bong, 2008-05-27 Based on the author's decipherment of prehistoric carvings and the application of mathematical measurements The Gods Machines shows how unknown phenomena from Angkor Wat to Stonehenge to crop circles are actually powerhouses built by an advanced extraterrestrial civilization for tapping electromagnetic energy The book traces the development of that civilization on Earth over 5 000 years revealing how all these structures are aligned according to a universal formula an angle of 135 degrees at which Earth's energy has been tapped by the alien creators of these monuments These fascinating theories not only explain our distant past but also open the door to a future of power technology and space travel Megalithic sites such as Newgrange and Stonehenge are constructed with quartz and iron rich stones with electrical conduction properties minerals also found atop Aztec temple and inside crop circles These stones according to the author served as dry cell batteries when heated and stressed and supplied energy to the builders traveling vehicles Most interestingly the author has tested his theory on today's crop circles The Gods Machines is certain to stimulate debate among readers interested in alternative history ancient civilization and extraterrestrial intelligence *The Poetical Works of William Wordsworth* William Wordsworth, 1885 The North

Pennines from Prehistory to Present Paul Frodsham, Martin Green, Greg Finch, 2024-11-14 The first comprehensive survey of the archaeology of the North Pennines from Mesolithic to modern times Traces of 10 000 years of human activity survive today including flint scatters at Mesolithic campsites earthworks of prehistoric and later settlements and field systems and extensive remnants of the post medieval miner farmer landscape **The Poetical Works** William Wordsworth, 1885
