British Children's Literature and the First World War David Budgen, 2018-05-17 Perceptions of the Great War have changed significantly since its outbreak and children's authors have continually attempted to engage with those changes explaining and interpreting the events of 1914-18 for young readers British Children's Literature and the First World War examines the role novels textbooks and story papers have played in shaping and reflecting understandings of the conflict throughout the 20th century David Budgen focuses on representations of the conflict since its onset in 1914 ending with the centenary

commemorations of 2014 From the works of Percy F Westerman and Angela Brazil to more recent tales by Michael Morpurgo and Pat Mills Budgen traces developments of understanding and raises important questions about the presentation of history to the young He considers such issues as the motivations of children s authors and whether modern children s books about the past are necessarily more accurate than those written by their forebears Why for example do modern writers tend to ignore the global aspects of the First World War Did detailed narratives of battles written during the war really convey the truth of the conflict Most importantly he considers whether works aimed at children can ever achieve anything more than a partial and skewed response to such complex and tumultuous events Longman Companion to Germany Since 1945 Adrian Webb,2014-09-09 This new Companion provides a wealth of information on the history of Germany since the Second World War including much material which is not readily available Throughout equal attention is devoted to East and West Germany and covers political social cultural and economic developments The author provides information on for example political parties and office holders living standards crime and the environment Germany s relationship with the European Union and East Germany up to 1990 Attention is also devoted to topical issues such as opposition and dissent in the East terrorism neo nazism and racial violence An essential reference book for anyone studying or teaching postwar Germany in history or politics departments The First World War Stuart Robson,2014-09-11 This is a compelling account of the First World War It offers clear analysis of the war on land sea and air and considers the impact of the war on Europe s civilian population Issues addressed include the relationship between war and industrialisation trench warfare the long term effects of the war on changing social structures and economic and demographic consequences The main text is supplemented by a rich selection of primary source material from songs soldiers slang to diary accounts The Longman Companion to Renaissance Europe, 1390-1530 Stella Fletcher,2014-02-04 This new Companion is the ideal reference guide It fills a gap by providing an authoritative but accessible reference on political economic religious social as well as cultural developments in this crucial period It contains information on all major topics including the church war and diplomacy civic life learning and letters printing the economy science and technology the arts across Europe and the wider world **The Longman Companion to America, Russia and the Cold War, 1941-1998** John W. Wilt,2001-09-20 Food for War is a ground breaking study of Britain s food and agricultural preparations in the 1930s as the nation once again made ready for war Historians writing about 1930s Britain have usually focused on the Depression

appeasement or political military and industrial concerns None have dealt adequately with another significant topic food and agriculture as the nation moved albeit reluctantly from peace to war In this new account Alan F Wilt makes right this omission by examining in depth the relationship between food agriculture and the nation s preparations for war He reveals how food and agriculture became closely linked to rearmament as early as 1936 that the government s preparations in this sector as contrasted with other areas of the economy were relatively well developed when war broke out in 1936 and that rural and farm interests well understood the effect that war would have on their way of life He argues that food and agriculture need to be integrated into the more general historical discourse for what happened in Britain in the 1930s not only set the stage for World War II but also contributed to a more robust agriculture in the decades that followed
