of evidence both Greek and Egyptian and from archaeology to literature Examining all forms of healing within the specific socioeconomic and environmental constraints of the Ptolemies Egypt this book explores how linguistic cultural and ethnic affiliations and interactions were expressed in the medical domain

**Papyri Bodleianae I** R.P. Salomons, 2023-10-16 This book consists of three parts 1 A full edition of 53 unpublished biblical and documentary papyri taken from the stock mentioned in part 3 2 Descripta In this part only a description of the physical condition of the papyrus and a transcription of the text together with short notes are given of all those fragments that may be expected to yield more results on a closer inspection and study or after some restoration of the papyrus in question 3 A catalogue or short description of the papyrological stock of the Bodleian Library in Oxford including the biblical the literary and documentary Greek and Latin papyri in strict shelf mark order

**Hippocrates and Medical Education** Manfred Horstmanshoff, 2010-10-25 The collection of writings known as the Corpus Hippocraticum played a decisive role in medical education for more than twenty four centuries This is the first full length volume on medical education in Graeco Roman antiquity since Kudlien s seminal article of 1970 Most of the articles in this volume were originally presented as papers at the XIIth International Colloquium Hippocraticum in Leiden in 2005

**The Hippocratic treatise** Elizabeth M. Craik, 2009 This is a new edition with translation introduction and commentary of the Hippocratic treatise On Glands Through a close analysis of both content and expression the text is interpreted and situated in the wider context of ancient medical writing

**Hippocrates in Context** P.J. van der Eijk, 2018-07-17 This collection of papers studies the Hippocratic writings in their relationship to the intellectual social cultural and literary context in which they were written Context includes not only the Greek world but also the medical thought and practice of other civilisations in the Mediterranean such as Babylonian and Egyptian medicine A further point of interest are the relations between the Hippocratic writings and non Hippocratic medical authors of the fifth and fourth century BCE such as Diocles of Carystus Praxagoras of Cos as well as Plato Aristotle and Theophrastus The collection further includes studies of some of the less well known works in the Hippocratic Corpus such as Internal Affections On the Eye and Prorrhethicon And finally a number of papers are devoted to the impact and reception of Hippocratic thought in later antiquity and the early modern period

**The Oriental Tradition of Paul of Aegina's Pragmateia** Peter Pormann, 2018-07-17 The volume investigates how Paul of Aegina s medical handbook or pragmateia was transmitted and transformed through Syriac and Arabic translations becoming one of the cornerstones of the Islamic medical tradition It uses new manuscript evidence in order to explore the crucial impact of Paul s pragmateia tracing its steps through different languages and cultures in the Middle East A discussion of different Syriac and Arabic authors who quote the pragmateia such as Ibn Serapion and Rhazes is followed by detailed studies of Greek Syriac Arabic translation technique examining for instance ophthalmologic terminology and giving a critical appraisal of translation syntax and lexicography Paul s influence on the development of medical theory in the Islamic world and beyond is also addressed making it an important contribution not only to Graeco

Arabic studies but also to the history of medicine in general      Hippocrates On Ancient Medicine ,2005 This volume presents an up to date Greek text of the Hippocratic treatise On Ancient Medicine along with a new English translation a detailed commentary focusing on questions of medical and scientific method and an introduction that places the work in its intellectual context      **The Oxford Handbook of Papyrology** Roger S. Bagnall,2011-12 Thousands of documentary and literary texts written on papyri and potsherds in Egyptian Greek Latin Aramaic Hebrew and Persian have transformed our knowledge of many aspects of life in the ancient Mediterranean and Near Eastern worlds Here experts provide a comprehensive guide to understanding this ancient documentary evidence      *Innovation in Byzantine Medicine* Petros Bouras-Vallianatos,2020 Byzantine medicine is the biggest unknown quantity in both the study of medieval medicine and science and in Byzantine studies This volume aims to redress this gap by presenting the first comprehensive examination of the medical corpus of John Zacharias Aktouarios arguably the most important Late Byzantine physician      *Dire Remedies: A Social History of Healthcare in Classical Antiquity* William V. Harris,2024-10-07 *Dire Remedies: A Social History of Healthcare in Classical Antiquity* is the first wide ranging social history of ancient healthcare Greek medicine is at the origin of modern medicine but it was very often ineffective What did people actually do when faced with pain and illness Starting with a review of ancient health conditions and a survey of what doctors had to offer W V Harris describes the multifarious practices and diverse kinds of people to whom Greeks and Romans turned for help Topics include the possible development of analgesics ancient ideas about contagion the history of the god Asclepius and more generally the role of religion and magic opinions about abortion ancient responses to mental illness and the invention of the hospital Taking into account the full range of textual sources and archaeological material this book attempts to provide an unprecedentedly realistic and readable depiction of the Greek and Roman responses to ill health      **Dis/ability in Mark** Lena Michelle Nogosseck-Raithel,2023-10-04 The gospel of Mark purposefully employs characters with specific and nuanced representations of dis ability to portray the unique authority the engaging message and the mission of the Markan Jesus Based on hermeneutical insights from Dis ability Studies this monograph is a contribution to the research of culturally and historically normalized corporeality in the biblical scriptures At the core of the investigation are the healing narratives passages that explicitly deal with a transformation from a described deviant bodily state to a positively valued corporeality Lena Nogosseck Raithel not only analyzes the terminological and historical descriptions of these physical phenomena but also investigates their narrative function for the gospel text The author argues that the images of dis ability employed are far from accidental Rather they significantly influence the narrative s structure and impact embody its theological claims and characterize its protagonist Jesus With this thorough exegetical analysis Nogosseck Raithel offers a firm historical foundation for anyone interested in the critical interpretation and theological application of the Markan healing narratives      **Galen on the Brain** Julius Rocca,2003-02-01 This book is a study of the ways in which Galen sought to establish the brain as the regent part

hegemonikon of the body utilising a rigorous anatomical epistemology and an often sophisticated but perforce limited set of physiological arguments Part One surveys the medical and philosophical past in which the study of the brain occurred and looks at the materials and methods which Galen employs to legitimate his hegemonic argumentation Part Two examines Galen's anatomical understanding of the brain especially the ventricles Part Three offers a critical evaluation of Galen's physiology of the brain This is the first monograph to offer a detailed account of this subject setting it within the cultural and intellectual contexts of its era and will be of interest to those in classics medical history history and philosophy of science and the history of ideas

**Medicine in the Biblical Background** Robert North, 2000 The author in view of the coverage of Medicine in his annual bibliography *Elenchus of Biblica* 1980-95 was invited to this survey at a Madrid Alcalá summer institute

*A New History Of Cataract Surgery* Christopher T. Leffler, 2025-08-14 Cataract surgery has been the procedure which has almost defined the profession of ophthalmology for millennia Patients have understood that cataract surgery could transform their lives in an almost miraculous way Much of the history of this surgery has been handed down to us and on occasion we have inherited some myths along with the facts In this two volume monograph we sought to uncover the reality behind the myths This book is entitled *A New History of Cataract Surgery* because it is based on original research from primary sources It is the work of 44 co authors from North America Europe the Middle East and Asia It contains new translations from Latin Greek Sanskrit Chinese Arabic Persian French Dutch and German It contains photographs from private collections We sought to tell stories you might have heard a little about from antiquity onward in a new way Many of the chapters in this book covering the 20th century were written by ophthalmologists who lived through the revolutionary changes in their field and were prime movers in making these advances

*The Art is Long* Julie Laskaris, 2018-07-17 This volume examines the fifth century medical treatise *On the Sacred Disease* as a sophistic speech and considers its position within the scientific tradition The first part concerns conceptions of science magic and medicine and establishes the antiquity of medicine as a specialized skill The latter part analyzes the treatise in light of sophistic oratory and explores its reception of traditional beliefs This analysis shows that traditional beliefs competition and rhetoric contributed to the intellectual tradition of science Traditional views are shown to have influenced ideas concerning physiology and disease aetiology and transmission Competition expressed in the terms of sophistic debate sharpened the author's arguments *On the Sacred Disease* is important evidence for the influence on fifth century medicine of both sophistic rhetoric and of older medical traditions

**Ancient Histories of Medicine** P.J. van der Eijk, 2018-07-17 This collection of essays focuses on the ways in which Greek and Latin authors viewed and wrote about the history of medicine in the ancient world Special attention is given to medical doxography i.e. the description of the characteristic doctrines of the great medical authorities of the past The volume examines the various attitudes to the history of medicine adopted by a wide range of ancient writers e.g. Aristotle Galen Celsus Herophilus Soranus Oribasius Caelius Aurelianus It discusses the historical sense of ancient medicine the

variety of versions of the medical past that were created and the wide range of purposes and strategies which medico historical writing served It also deals with the question of the sources the role of historiographical traditions and the variety of literary genres of ancient medico historical writing      Diocles of Carystus. Volume 2, Commentary P.J. van der Eijk, 2018-07-17 Diocles of Carystus 4th century BCE also known as the younger Hippocrates was one of the most prominent medical authorities in antiquity He wrote extensively on a wide range of areas such as anatomy physiology pathology therapeutics embryology gynaecology dietetics foods and poisons In his writings he betrays strong philosophical influence and his views present striking connections with the Hippocratic Corpus Plato Aristotle and Theophrastus The study of Diocles ideas has long been hampered by the absence of a reliable collection of the remaining evidence This book presents and discusses all the fragments and testimonies to Diocles views Following on from the first volume which presented the Greek Latin and Arabic sources with facing English translation the second volume provides a commentary on the fragments and places them in their intellectual context      Medical Latin in the Roman Empire D. R. Langslow, 2000-06-08 Despite the ubiquitous importance of medicine in Roman literature philosophy and social history the language of Latin medical texts has not been properly studied This book presents the first systematic account of a part of this large rich field Concentrating on texts of high medicine written in educated even literary Latin Professor Langslow offers a detailed linguistic profile of the medical terminology of Celsus and Scribonius Largus first century AD and Theodorus Priscianus and Cassius Felix fifth century AD with frequent comparisons with their respective near contemporaries The linguistic focus is on vocabulary and word formation and the book thus addresses the large question of the possible and the preferred means of extending the vocabulary in Latin at the beginning and end of the Empire Some syntactic issues including word order and nominalization are also discussed and sections on the sociolinguistic background and stylistic features consider the question to what extent we may speak of medical Latin in the strong sense as the language of a group and draw comparisons and contrasts between ancient and modern technical languages
