involving a number of Spanish American diplomats as sponsors and Spanish exiles as writers and translators shaped the characteristics of its publications and how the notion of useful knowledge conveyed by them was deployed in the service of both commercial and educational concerns The hitherto unexplored mechanisms of book import distribution wholesale and retailing in Spanish America in the 1820s are also analysed as is the way in which the significance of the knowledge transmitted by those books shifted in the course of their production and distribution The author examines how the question and answer form of Ackermann's textbooks constrained both publishers and writers and oriented their readers relation with the texts She then looks at the various ways in which foreign knowledge was appropriated in the construction of individual social national and continental identities this is done through the study of a number of individual reading experiences and through the analysis of the editions and adaptations of Ackermann's textbooks during the nineteenth century

una herramienta de investigación de gran utilidad para investigadores bibliotecarios libreros y coleccionistas Los dos volúmenes resultarán de enorme valor a todo aquel investigador interesado en la literatura la historia y la cultura de la Península Ibérica de la Edad Moderna *Dynamic Astronomy in Latin America* Carlos Abad, Ángel Bongiovanni, Yaneth Guillén, 2006

The Third International Meeting of Dynamic Astronomy in Latin America Tercera Reunión sobre Astronomía Dinámica en Latinoamérica which we named ADeLA 2004 was held on November 22-24 2004 in Mérida It represents the consolidation and continuity of a series of meetings about Astrometry and related topics The first meeting took place in 2001 in San Juan Argentina followed by the second meeting in 2002 in Araraquara Brazil Astrometry after an original and basic contribution not only to Astronomy as a branch of science but also to the direct development of society starts declining when in the middle of the twentieth century it gets far from astrophysical research and the human mind finds alternative ways to solve the upcoming development problems This fact has progressively made the financing models for scientific projects focus on and expand towards the more productive areas of Astronomy leaving aside Astrometry which we consider a vital area Even when preparing themselves academically the astrometrists with their meticulous work do not find easily government support and ways to compete The rapid development of detectors and observation techniques during the last decade has almost completely transformed Astronomy The data collected from observation are once again the main source for the theoretical development of this science Moreover observations have often changed many theoretical concepts Astrometry has not been left behind and the future almost magical observations include the space projects such as GAIA and SIM These projects should be seen as the spur for the adaptation of Astrometry to the new era making this area a basic one in the professional training of any astronomer The astrometrist is the one whomust enlarge his scope to encompass data interpretation taking advantage of the meticulous and craftsman like character that this work has always had in order to access the big data bases that will be generated and are in danger of being considered as sources of statistical information This concern for the future of Astrometry was discussed in this meeting ADeLA 2004 had two additional innovations The first one consisted in including a workshop or a series of conferences on topics related to Astrometry addressed to students interested in astronomy This meeting has offered the opportunity to gather important foreign researchers The participation of ESO Vitacura Chile researchers in ADeLA 2004 as well as the usual ADeLA meeting participants facilitated a wide and diverse series of lectures on related topics These lectures were addressed both in a pedagogical and a professional atmosphere which encouraged Venezuelan undergraduate and graduate students interested in or majoring in astronomy to participate in both events The so called Taller de ADeLA 2004 took place after the meeting on November 25 and 26 The workshop improved the relationships between the Venezuelan scientific and student communities **Proceedings, American Philosophical Society (vol. 138, No. 1, 1994)** , El Monitor de la Educación Común , 1923 Vols for 1905-19 include Sección oficial separately paged
