

Dealing with Loss and Change

Helping children deal with change, loss or grief is very challenging. Having activities where the children are given opportunities to express themselves can help with the healing process and give them a strategy to begin to deal with their loss.

Most of these activities are designed to work in small groups or 1-to-1, although the memory tree can work with larger groups.

Memory Tree

This activity is designed for use when a large group, or even a whole class, of children may have suffered a loss. Create a tree with the children, including a trunk and branches. Each child then takes a leaf and writes or draws something on it, which could be a memory, a feeling or anything else the children might want to express.

Memory Book

Children create a 'scrapbook' which contains their memories, thoughts and feelings. They can put a picture or photograph on the front and then add whatever they want inside. Ideas can be suggested to the children but it should be led by them.

They might:

- Draw pictures
- Use photographs
- Write a letter
- Have pages for different things (e.g. interests, places, foods, etc)
- Make a family tree
- Collect memories from other people

This activity could be extremely helpful for children experiencing change or loss. They will probably want to talk about the things they are adding, making this invaluable.

Memory Box or Jar

These work in the same way as the memory book except that objects can also be added. These can be personal artefacts or anything else that the child wishes to put inside. Jars can be filled with shells or pebbles which represent different memories. The children could write or draw on the pebbles and use them to represent their thoughts and memories.

Memory Bracelet

A memory bracelet is created using beads that represent different things for the children. It's a good idea to have a selection of beads in different colours or shapes so the children can select ones to hold separate meanings or memories. When discussing change, the bracelet could be made up of 'things they miss' as well as 'positive' aspects of the change (e.g. if they've moved school, they could make new friends). Children receiving medical intervention are sometimes given bracelets, with beads representing each treatment they've been given.

Loss and Change Peter Marris,1974 *Loss and Change (Psychology Revivals)* Peter Marris,2014-10-10 First published in 1974 then reissued in 1986 with a long introduction by the author which developed the analysis in the light of recent theory and related it to work done in the field since its first publication The late Peter Marris shows how understanding grief can help us to understand processes of change both personal and social and to handle them with more compassion for ourselves and others He sees grieving as the working out of a psychological reintegration whose principles are essentially similar whether the structures of meaning of our life fall apart from the loss of a personal relationship of a predictable social context or of an interpretable world Marris draws on his wide ranging research to develop his argument A study of widows a description of the devastating effects of urban renewal projects on people whose familiar neighbourhoods are destroyed an analysis of the activities of tribal associations in Nigeria and reflections on the analogies between scientific and political revolutions are a few of the studies Marris weaves together in tracing the meaning of change and loss in human life

Making Meaning of Loss Richard L. Hayes,2022-10-31 Making Meaning of Loss Change and Challenge Across the Lifespan is about how change brings loss to our lives how we make meaning of loss and how our experience with loss directs our encounters with loss in the future Each loss challenges us in this way to rethink our world view to ask who we have

become and to reinvent ourselves anew Taking a lifespan approach Hayes examines how we make sense of the losses that change brings in each period of our lives and how the way in which we meet the challenge that each loss brings directs our encounters with loss in the future In addition he provides suggestions for how earlier losses can become fruitful allies in encounters with change in the present and how caregivers can help others to make meaning of the loss in their lives Above all this book is about how caregivers can help others learn from the losses in their lives and to recognize what part of the past to bring along into the present in constructing a more reliable self for meeting the challenges of an uncertain future
