Loss Of Habitat:

Habitat Fragmentation and Landscape Change David B. Lindenmayer, Joern Fischer, 2013-02-22 Habitat loss and degradation that comes as a result of human activity is the single biggest threat to biodiversity in the world today. Habitat Fragmentation and Landscape Change is a groundbreaking work that brings together a wealth of information from a wide range of sources to define the ecological problems caused by landscape change and to highlight the relationships among landscape change, habitat fragmentation and biodiversity conservation. The book synthesizes a large body of information from the scientific literature, considers key theoretical principles for examining and predicting effects, examines the range of effects that can arise, explores ways of mitigating impacts, reviews approaches to studying the problem, discusses knowledge gaps and future areas for research and management. Habitat Fragmentation and Landscape Change offers a unique mix of theoretical and practical information, outlining general principles and approaches and illustrating those principles with case studies from around the world. It represents a definitive overview and synthesis on the full range of topics that fall under the widely used but often vaguely defined term habitat fragmentation.

Deforestation and Habitat Loss Jaime Simmons, 2017-12-15 Forests are essential to human and animal survival. Trees produce the oxygen animals need to live. They also provide homes for animals and resources for people. However, Earth's forests are under attack. Deforestation is caused by fires, clear cutting, logging, and climate change. Forests are important to mitigating climate change because they suck up harmful carbon dioxide. Without forests, many plant and animal species would be at risk of becoming endangered or extinct. Complete with manageable text and stunning photographs of forests both healthy and threatened, this book covers essential concepts featured in elementary earth science curricula.

Loss of Biodiversity David M. Barker, 2011 This title examines one of the world's critical issues: human trafficking. Readers will learn the historical background of this issue leading up to its current and future impact on society. Various forms of modern slavery, including debt bondage, child labor, prostitutes, sex slaves, and child soldiers, are discussed in detail, as well as risk factors for trafficking such as poverty, violence, and cultural, traditional, or religious views. Also covered are the physical, psychological, and spiritual impact trafficking survivors experience, laws intended to combat human trafficking, the tier system, and organizations such as the United Nations and UNICEF. Engaging text, informative sidebars, and color photographs present information realistically, leaving readers with a thorough, honest interpretation of human trafficking. Features include a timeline, facts, additional resources, Web sites, a glossary, a bibliography, and an index. Essential Issues is a series in Essential Library, an imprint of ABDO Publishing Company.
