One Small Step? Gerhard Wisnewski, 2012-12-17 Is it possible that the famous American moon landings were nothing but an illusion a fabrication Could NASA have fooled the world by broadcasting simulations that had been filmed for training purposes From the very first manned flight into orbit right up to the present day there have been serious anomalies in the official narrative of the conquest of space Bestselling author Gerhard Wisnewski dissects the history in minute detail from the first Russian missions to the final American moon project of Apollo 17 looking at films photos radio communications personal statements and any other available material Using forensic methods of investigation he pieces together a complex jigsaw depicting a disturbing picture of falsifications lies and fakery in the Cold War struggle for supremacy between the Soviet Union and the USA The evidence he presents casts serious doubt on the possibility of humans ever having walked on the moon Wisnewski's research calls for a reassessment of the received wisdom that has entered the fabric of our culture The true story of space exploration has a more sinister undertone he argues Beneath the guise of civilian space travel the US military has been developing fearsome new equipment and weapons to be secretly stationed in space with the aim of militarizing the orbit around the earth The potential targets every human being on the planet Profusely illustrated with over 200 photos and diagrams

Apollo 13 Laura B. Edge, 2020-03-03 Houston we've had a problem On April 13 1970 the three astronauts aboard the Apollo 13 spacecraft were headed to the moon when a sudden explosion rocked the ship Oxygen levels began depleting rapidly Electrical power began to fail Astronauts James Lovell Jack Swigert and Fred Haise were about to be stranded in the inky void of outer space The mission to the moon was scrapped Now Apollo 13's only goal was to bring the crew home With the damaged spacecraft hurtling towards the moon at roughly six thousand miles per hour there was little hope of success But the astronauts and mission control were fully prepared to do whatever it took to return the crew to Earth This space disaster occurred at the peak of the United States Space Race against the Soviet Union But for four days in 1970 the two nations put aside their differences and the entire world watched the skies hoping and praying the astronauts would return safely As missions to Mars and commercial space flight become a reality the time is now to be reminded of our common humanity of how rivals can work together and support each other towards a shared goal Because no matter what happens or where we travel we all call Earth home
