Floré, Cammie McAtee, 2017-02-10 In many different parts of the world modern furniture elements have served as material expressions of power in the post war era They were often meant to express an international and in some respects apolitical modern language but when placed in a sensitive setting or a meaningful architectural context they were highly capable of negotiating or manipulating ideological messages The agency of modern furniture was often less overt than that of political slogans or statements but as the chapters in this book reveal it had the potential of becoming a persuasive and malleable ally in very diverse politically charged arenas including embassies governmental ministries showrooms exhibitions design schools libraries museums and even prisons This collection of chapters examines the consolidating as well as the disrupting force of modern furniture in the global context between 1945 and the mid 1970s The volume shows that key to understanding this phenomenon is the study of the national as well as transnational systems through which it was launched promoted and received While some chapters squarely focus on individual furniture elements as vehicles communicating political and social meaning others consider the role of furniture within potent sites that demand careful negotiation whether between governments cultures or buyer and seller In doing so the book explicitly engages different scholarly fields design history history of interior architecture architectural history cultural history diplomatic and political history postcolonial studies tourism studies material culture studies furniture history and heritage and preservation studies Taken together the narratives and case studies compiled in this volume offer a better understanding of the political agency of post war modern furniture in its original historical context At the same time they will enrich current debates on reuse relocation or reproduction of some of these elements *Architectures of Bureaucracy* Jens van de Maele, 2025-01-27 This monograph examines the interrelationship between politics and modernist architecture in interwar Belgium focusing on political architectural and administrative elites as propagators of new ideas of governance While Belgium was strongly influenced by neighbouring France and Germany it also developed its own avant garde approaches to socio political problems In the second half of the 1930s the country was the scene of a remarkable political and architectural experiment involving an ambitious plan for the large scale construction of modernist government office buildings These buildings were seen as essential to the development of a technocratic model of governance aimed at strengthening the role of the executive and minimising the influence of parliament More specifically the efficient new office architecture was supposed to create a new type of perfect civil servant whose loyalties would no longer lie with political parties but with scientists and management experts Such experts and scientists constituted a rising elite of homines novi with strong though often veiled political ambitions As such this book contributes to our understanding of political culture in the age of extremes The Other Modern Movement

Kenneth Frampton, 2022-01-25 A revealing new look at modernist architecture emphasizing its diversity complexity and broad inventiveness Usually associated with Mies and Le Corbusier the Modern Movement was instrumental in advancing new technologies of construction in architecture including the use of glass steel and reinforced concrete Renowned historian Kenneth Frampton offers a bold look at this crucial period focusing on architects less commonly associated with the movement in order to reveal the breadth and complexity of architectural modernism The Other Modern Movement profiles nineteen architects each of whom consciously contributed to the evolution of a new architectural typology through a key work realized between 1922 and 1962 Frampton s account offers new insights into iconic buildings like Eileen Gray s E 1027 House in France and Richard Neutra s Kaufmann House in Palm Springs California as well as lesser known works such as Antonin Raymond s Tokyo Golf Club and Alejandro de la Sota s Maravillas School Gymnasium in Madrid Foregrounding the ways that these diverse projects employed progressive models advanced new methods in construction techniques and displayed a new sociocultural awareness Frampton shines a light on the rich legacy of the Modern Movement and the enduring potential of the unfinished modernist project Modern Architecture: A Critical History (Fifth) (World of Art)

*Brussels Housing* Gérald Ledent, Alessandro Porotto, Kristiaan Borret, 2025-02-17 Modern urban terraced houses or row houses emerged in Europe from the 17th century onwards. Usually two to three storeys high and with a garden at the back they formed the traditional urban block. In Brussels this bourgeois form of housing took on a particularly varied and inspiring form including the well known Art Nouveau residences and forms the DNA of the city to this day. This publication analyses 100 selected examples illustrating the emergence of the terraced house and its further development in other forms of housing. The result is a broad panorama and a history of the architecture and development of the city of Brussels with its particularly heterogeneous cityscape. This expanded edition comprises a new chapter by Kristiaan Borret, the city's former bouwmeester. 13 new case studies were added and the content was updated. A project index facilitates quick navigation. With a photo essay by the well known Belgian photographer Maxime Delvaux. All plans have been drawn in standard scales especially for the publication. An atlas of exemplary historical and contemporary housing typologies. Substantially expanded edition of the successful typological manual.
