Ley,2014-07-10 The media today is filled with powerful men in trouble for their sexual behaviors and invariably they are diagnosed as sexual addicts Since Adam first hid his nakedness from God and pointed the finger at Eve men have struggled to take responsibility for their sexuality Over the past three decades these behaviors have come to reflect not a moral failing but instead evidence of an ill defined disease that of sexual addiction The concept of sexual addiction is a controversial one because it is based on questionable research and subjective moral judgments Labeling these behaviors as sex addiction asserts a false dangerous

myth that undermines personal responsibility Not only does this epidemic of sex addiction excuse mislabel male sexuality as dangerous and unhealthy but it destroys our ability to hold people accountable for their behaviors By labeling males as weak and powerless before the onslaught and churning tide of lust we take away those things that men should live up to personal responsibility integrity self control independence accountability self motivation honor respect for self and others In The Myth of Sex Addiction Ley presents the history and questionable science underlying this alleged disorder exposing the moral and cultural judgments that are embedded in the concept as well as the significant economic factors that drive the label of sex addiction in clinical practice and the popular media Ley outlines how this label represents a social attack on many forms of sexuality male sexuality in particular as well as presenting the difficulty this label creates in holding people responsible for their sexual behaviors Going against current assumptions and trends Ley debunks the idea that sex addiction is real or at least that it is as widespread as it appears to be Instead he suggests that the high sex behaviors of some men is something that has been tacitly condoned for countless years and is only now labeled as a disorder as men are being held accountable to the same rules that have been applied to women He suggests we should expect men to take responsibility for sexual choices rather than supporting an approach that labels male sexual desire as a demonic force that must be resisted feared treated and exorcised

Love Cycles Linda Carroll,2014-08-31 In Love Cycles veteran couples therapist Linda Carroll presents a groundbreaking model of the five natural stages of romantic relationships the Merge Doubt and Denial Disillusionment Decision and Wholehearted Love and a guide for navigating through them toward lasting love Love Cycles helps readers understand where they are in the cycle of their relationship and provides a clear strategy for how to stay happy and committed even in difficult times *Evolutionary Social Psychology* Jeffry A. Simpson,Douglas T. Kenrick,2014-02-25 What a pity it would have been if biologists had refused to accept Darwin s theory of natural selection which has been essential in helping biologists understand a wide range of phenomena in many animal species These days to study any animal species while refusing to consider the evolved adaptive significance of their behavior would be considered pure folly unless of course the species is homo sapiens Graduate students training to study this particular primate species may never take a single course in

evolutionary theory although they may take two undergraduate and up to four graduate courses in statistics These methodologically sophisticated students then embark on a career studying human aggression cooperation mating behavior family relationships or altruism with little or no understanding of the general evolutionary forces and principles that shaped the behaviors they are investigating This book hopes to redress that wrong It is one of the first to apply evolutionary theories to mainstream problems in personality and social psychology that are relevant to a wide range of important social phenomena many of which have been shaped and molded by natural selection during the course of human evolution These phenomena include selective biases that people have concerning how and why a variety of activities occur For example information exchanged during social encounters is initially perceived and interpreted people are romantically attracted to some potential mates but not others people often guard protect and work hard at maintaining their closest relationships people form shifting and highly complicated coalitions with kin and close friends and people terminate close long standing relationships Evolutionary Social Psychology begins to disentangle the complex interwoven patterns of interaction that define our social lives and relationships
