P-51 Mustang Gardner N. Hatch,1993 Fittingly named for a wild horse this fighter became widely recognized for its power and beauty It was a key element in Allied air superiority in Europe during WWII destroying 9 081 enemy aircraft and with similar results in the Korean War Striking photos and the personal stories of the men who flew it help to tell the story of this superior aircraft Full color photos of restored P 51s Revised and updated **North American P-51 Mustang** Malcolm Lowe,2009-12-15 The P 51 Mustang is one of the greatest warplanes of all time Developed as a private venture it was seized upon by the British as the answer to their shortage of fighter aircraft in the early months of World War Two Early Allison engined Mustangs lacked performance at high altitude but the great promise of the airframe was clear and when fitted with the Rolls Royce Merlin the Mustang became one of the best pistoned engined fighters ever built Not only was its performance on a par with the best British and German fighters of the era but it was the first single engined fighter with range sufficient to accompany bombers from Great Britain to Berlin and back This new history of the Mustang tells the full story of its development technical features and operational history and also looks at its long post war career as warbird and racer Malcolm Lowe also dispels many of the myths that have grown up around the Mustang *North American P-51 Mustang* Mantell - Brown - Kittel - Graf,2016-02-07 The Mustang is considered the best fighter of World War II The outstanding flight characteristics of this elegant aircraft were due to the adoption of a wing profile laminar particularly designed for high speeds and other measures which concerned the radiator and the careful study of the various components for quick construction on an industrial scale Capable of reaching high altitudes was also used in the escort bombers In addition to the United States was exported to many foreign countries that have employed in some cases until the 70s Entered service with the A M in 1948 replacing the now exhausted Spitfire line hunting Although the first models equipped with Allison engine cylinders in line they were good low altitude aircraft it was only with the adoption of the Rolls Royce Merlin engine mounted on later models the Mustang was able to give the best of himself The essential simplicity of the design coupled with a pleasant look and aerodynamic constituted a great potential for development and the consequence was that the Mustang excelled in two fields powerful fighter bomber operating at low altitude and high altitude escort fighter with long range In the first as the Mustang was able to develop a formidable firepower including the firing of rockets and bombs in the second role thanks to extra tanks that were dropped when empty was the first Allied fighter escort to make raid down over Berlin and Tokyo In every respect the Mustang was a big plane much loved by the pilots and crews of the escorting bombers and greatly feared by the Japanese and German pilots With the engine Merlin Mustang had phenomenal qualities of speed both up and acceleration All this combined with excellent maneuverability made him a fighter truly superlative performance **Republic P-47 Thunderbolt - North American P-51 Mustang** Mantelli - Brown - Kittel - Graf,2017-03-03 The Republic P 47 Thunderbolt nicknamed Jug was an American fighter comes with an extremely powerful

engine 2 000 hp or more and it was fast especially at high altitude It was also heavily armed with eight 12 7 mm machine guns and its strength allowed him to return to base even if badly damaged The North American P 51 Mustang is considered among the best fighters of World War II Produced starting from 1941 he was one of the most versatile American fighters of the Second World War It was deployed both in the Pacific and on that European opposition to the planes of the Luftwaffe It was mainly used as a fighter escort to the formations of bombers Boeing B 17 but also as a fighter bomber **Mustang**

**Designer** Ray Wagner,2014-12-02 Mustang Designer tells the story of American wartime fighter development including engines and armaments as part of a nationwide program of aircraft builders and fliers focusing on Edgar Schmued the designer of the Mustang The P 51 Mustang is widely regarded as the best propeller driven fighter that ever flew What many might not realize is that the plane s developer was a German migrant This book tells of how Schmued created a weapon that would ultimately prove lethal to the aspirations of those who had seized control over his native land **P-51 Mustang**

Robert Jackson,Lynn Ritger,2020-09-30 An illustrated history of the renowned fighter aircraft ideal for modelers and aviation enthusiasts Highly recommended AMPS Indianapolis The North American P 51 Mustang was one of the most successful and effective fighter aircraft of all time It was initially produced in response to a 1940 RAF requirement for a fast heavily armed fighter able to operate effectively at altitudes in excess of 20 000 feet North American built the prototype in 117 days and the aircraft designated NA 73X flew on October 26 1940 The first of 320 production Mustang Is for the RAF flew on May 1 1941 powered by an 1 100hp Allison V 1710 39 engine RAF test pilots soon found that with this powerplant the aircraft did not perform well at high altitude but that its low level performance was excellent It was when the Mustang airframe was married to a Packard built Rolls Royce Merlin engine that the aircraft s true excellence became apparent Possessing a greater combat radius than any other Allied single engine fighter it became synonymous with the Allied victory in the air During the last eighteen months of the war in Europe escorting bomber formations it hounded the Luftwaffe to destruction in the very heart of Germany In the Pacific operating from advance bases it ranged over the Japanese Home Islands joining carrier borne fighters such as the Grumman Hellcat to bring the Allies massive air superiority Yet the Mustang came about almost by accident a product of the Royal Air Force s urgent need for new combat aircraft in the dark days of 1940 when Britain fighting for survival turned to the United States for help in the island nation s darkest hour This is its story including plentiful photos and information for modelers Mustang the Inspiration Philip Kaplan,2013-02-19 If it looks right it will probably fly right a tired old saying among airmen but one that persists Think if you will of the handful of aeroplanes that most people would probably agree are the best looking examples of all The list is short but distinguished and the proof is in the enthusiastic common view of most pilots who have flown them for nearly all it was love at first sight and first flight For most that little list includes the Vickers Supermarine Spitfire the Douglas DC 3 the Hawker Hunter the Lockheed Constellation the Concord and the North American Mustang Of these the Spitfire and Mustang stand out and remain extra special to the

majority of pilots who have been privileged to fly them One common thread exists among those who have experienced both of these fine machines an opinion that seems to hold up even after a lifetime of flying the best the aviation design community has created While the Spitfire may have a slight edge in light touch handling if I have to go to war in one type Ill take the Mustang every time This comprehensive account of the Mustang aircraft charts the operational history of the craft and also relays a the personal stories and experiences of the men who flew the Cadillac of the skies as it has been described A vivid and enthralling history set to appeal to aviation enthusiasts looking for more than just a mere operational history of the Mustang s exploits
