Conflict between work and family has been a topic of discussion since the beginning of the women's movement but recent changes in family structures and workforce demographics have made it clear that the issues impact both women and men. While employers and policymakers struggle to navigate this new terrain, critics charge that the research sector too has been slow to respond. *Gender and the Work Family Experience* puts multiple faces, male as well as female, on complex realities with interdisciplinary and cross-cultural awareness and research-based insight. Besides reviewing the state of gender roles as they affect home and career, this in-depth reference examines and compares how women and men experience work-family conflict and its consequences for relationships at home as well as outcomes on the job. Topics as wide-ranging as gendered occupations, gender and shiftwork, heteronormative assumptions, the myth of the ideal worker, and gendered aspects of work-family guilt reflect significant changes in society and reveal important implications for both research and policy. Also included in the coverage: Gender ideology and work-family plans of the next generation; Gender poverty and the work-family interface; The double jeopardy effect; the importance of gender and race in work-family research; When work intrudes upon employees' personal time; does gender matter? Work-family equality; the importance of a level playing field at home; Women in STEM; family-related challenges and initiatives; Family-friendly organizational policies, practices, and benefits through the gender lens; Geared toward work-family and gender researchers as well as students and educators in a variety of fields, *Gender and the Work Family Experience* will find interested readers in the fields of industrial and organizational psychology, business management, social psychology, sociology, gender studies, women's studies, and public policy among others.

**Adapting to Climate Change** Bruce C. Glavovic, Gavin P. Smith, 2014-04-18 This book identifies lessons learned from natural hazard experiences to help communities plan for and adapt to climate change. Written by leading experts, the case studies examine diverse experiences from severe storms to sea level-related hazards, droughts, heat waves, wildfires, floods, earthquakes, and tsunamis in North America, Europe, Australasia, Asia, Africa, and Small Island Developing States. The lessons are grouped according to four imperatives: i) Develop collaborative governance networks; ii) build adaptive capabilities; iii) invest in pre-event planning; and iv) the moral imperative to undertake adaptive actions that advance resilience and sustainability. A theoretically rich and empirically grounded analysis of the interface between disaster risk management and climate change adaptation, comprehensive yet accessible and very timely. Mark Pelling, Department of Geography, King's College London, UK. This book represents a major contribution to the understanding of natural hazards planning as an urgent first step for reducing disaster risk and adapting to climate change to ensure sustainable and equitable development. S. Ivano Briceo, Vice Chair, Science Committee, Integrated Research on Disaster Risk (IRDR), an ICSU/ISSC/ISDR programme. Former Director, International Strategy for Disaster Reduction (UNISDR). What a welcome addition to the young literature on climate adaptation and hazard mitigation! Bruce Glavovic and Gavin Smith each bring to the editing task a rare blend of solid scholarly attainment and on-the-ground experience that shines through in this extensively documented synthesis of theoretical ideas from the realms of

climate and hazards and their validation in a rich set of diverse case studies pulled in from around the world This book should remain a classic for many years William H Hooke American Meteorological Society *Report of the Commission on Agricultural Workers* United States.
