Purpureae Vestes I. Textiles y tintes del Mediterráneo en época romana Carmen Alfaro Giner, 2011-11-28 *Purpureae vestes* estudia un element fonamental en la vida de qualsevol societat antiga com s el vestit i els colors utilitzats per a la seua ornamentaci especialment la p rpura El luxe en el vestir implicava l s de materials com l or per a la confecci de certs complements Amb uns antecedents clarament orientals de recerca de la magnific ncia externa de reis i d altres dignataris el simbolisme del

color en l'ornamentació personal va constituir a les ciutats riberenques de la Mediterrània un factor important de distinció social. B fossen de procedència vegetal, mineral o animal, els tints van donar sempre l'ènim als tèxtils. Per això, el poder imperial romà en alguns períodes de la seua història va controlar amb normes legals de major o menor duresa els de determinats colors obtinguts a partir de gasteròpodes marins. L'obra tracta extensament els aspectes econòmics i tècnics relacionats amb l'elaboració i comercialització de vestits i teles per a altres usos, veles, adorns de la llar, etc. A partir de diversos punts de vista, entre els quals s'inclouen les dades arqueològiques o les referències etnogràfiques comparatives, s'hi incideix en les etapes de preparació de les fibres tèxtils en les formes d'elaboració dels teixits més complexos a través de la reconstrucció experimental en el treball dels pescadors i manufacturadors que elaboraven en tallers costaners el tint més valorat, la porpora, o en els qui treballaven en els tallers de la ciutat, així com en l'anàlisi i descripció detallada dels resultats extrets de les restes tèxtils aparegudes en jaciments de l'Egipte romà, sobretot que ens mostren encara avui la riquesa i viure dels seus colors. **The**

Textile Revolution in Bronze Age Europe Serena Sabatini, Sophie Bergerbrant, 2020. Discusses both the revolutionary cultural, social and economic impact of Bronze Age textile production in Europe and innovative methodologies for future studies. Ancient Textiles Marie-Louise Nosch, C. Gillis, 2007-03-10. An understanding of textiles and the role they played in the past is important for anyone interested in past societies. Textiles served and in fact still do as both functional and symbolic items. The evidence for ancient textiles in Europe is split quite definitely along a north-south divide, with an abundance of actual examples in the north but precious little in the south, where indirect evidence comes from such things as vase painting and frescoes. This volume brings together these two schools to look in more detail at textiles in the ancient world and is based on a conference held in Denmark and Sweden in March 2003. Section one, Production and Organisation, takes a chronological look through more than four thousand years of history from Syria in the mid-third millennium BC to Seventeenth Century Germany. Section two, Crafts and Technology, focuses on the relationship between the primary producer, the craftsman and the secondary receiver, the archaeologist-conservator. The third section, Society, examines the symbolic nature of textiles and their place within ancient societal groups. Throughout the book, emphasis is placed on the universality of textiles and the importance of information exchange between scholars from different disciplines. A small book on finds. First Aid for the Excavation of Archaeological Textiles is included as an Appendix. Textile Production in Pre-Roman Italy Margarita Gleba, 2008-11-05. Older than both ceramics and metallurgy, textile production is a technology which reveals much about prehistoric social and economic development. This book examines the archaeological evidence for textile production in Italy from the transition between the Bronze Age and Early Iron Ages until the Roman expansion, 1000-400 BCE, and sheds light on both the process of technological development and the emergence of large urban centres with specialised crafts. Margarita Gleba begins with an overview of the prehistoric Apennine peninsula, which featured cultures such as the Villanovans and the Etruscans and was connected through colonisation and trade with the other parts of the Mediterranean.

She then focuses on the textiles themselves their appearance in written and iconographic sources the fibres and dyes employed how they were produced and what they were used for we learn for instance of the linen used in sails and rigging on Etruscan ships and of the complex looms needed to produce twill Featuring a comprehensive analysis of textiles remains and textile tools from the period the book recovers information about funerary ritual the sexual differentiation of labour the spinners and weavers were usually women and the important role the exchange of luxury textiles played in the emergence of an elite Textile production played a part in ancient Italian society s change from an egalitarian to an aristocratic social structure and in the emergence of complex urban communities

Medieval Clothing and Textiles Robin Netherton, Gale

R. Owen-Crocker, Monica L. Wright, 2015 A wide ranging and varied collection of essays which examine surviving garments methods of production and clothes in society The second decade of this acclaimed and popular series begins with a volume that will be essential reading for historians and re enactors alike Two papers consider cloth manufacture in the early medieval period Ingvild ye examines the graves of prosperous Viking Age women from Western Norway which contained both textile making tools and the remains of cloth considering the relationship between the two Karen Nicholson compliments this with practical experiments in spinning This is followed by Tina Anderlini s close examination of the details of cut and construction of a thirteenth century chemise attributed to King Louis IX of France St Louis out of its shrine for the first time since 1970 Three papers consider fashionable clothing and morality Sarah Grace Heller discusses sumptuary legislation from Angevin Sicily in the 1290s which sought to restrict men s dress at a time when preparation for war was more important than showy clothes Cordelia Warr examines the dire consequences of a woman dressing extravagantly as portrayed in a fourteenth century Italian fresco and Emily Rozier discusses the extremes of dress attributed by moral and satirical writers to the men known as galaunts Two textual studies then show the importance of textiles in daily life Susan Powell reveals the austere but magnificent purchases made on behalf of Lady Margaret Beaufort mother of King Henry VII in the last ten years of her life 1498 1509 Anna Riehl Bertolet discusses in detail the passage in Shakespeare s A Midsummer Night s Dream where Helena passionately recalls sewing a sampler with Hermia when they were young and still bosom friends

Greek and Roman Textiles and Dress Mary Harlow, Marie-Louise Nosch, 2014-09-30 Twenty chapters present the range of current research into the study of textiles and dress in classical antiquity stressing the need for cross and inter disciplinary study in order to gain the fullest picture of surviving material Issues addressed include the importance of studying textiles to understand economy and landscape in the past different types of embellishments of dress from weaving techniques to the late introduction of embroidery the close links between the language of ancient mathematics and weaving the relationships of iconography to the realities of clothed bodies including a paper on the ground breaking research on the polychromy of ancient statuary dye recipes and methods of analysis case studies of garments in Spanish Viennese and Greek collections which discuss methods of analysis and conservation analyses of textile tools from across the Mediterranean

discussions of trade and ethnicity to the workshop relations in Roman fulleries Multiple aspects of the production of textiles and the social meaning of dress are included here to offer the reader an up to date account of the state of current research The volume opens up the range of questions that can now be answered when looking at fragments of textiles and examining written and iconographic images of dressed individuals in a range of media The volume is part of a pair together with Prehistoric Ancient Near Eastern and Aegean Textiles and Dress an interdisciplinary anthology edited by Mary Harlow C cile Michel and Marie Louise Nosch

Preserved in the Peat Andy M. Jones, 2016-11-30 Excavation of a Scheduled burial mound on Whitehorse Hill Dartmoor revealed an unexpected intact burial deposit of Early Bronze Age date associated with an unparalleled range of artefacts The cremated remains of a young person had been placed within a bearskin pelt and provided with a basketry container from which a braided band with tin studs had spilled out Within the container were beads of shale amber clay and tin two pairs of turned wooden studs and a worked flint flake A unique item possibly a sash or band made from textile and animal skin was found beneath the container Beneath this the basal stone of the cist had been covered by a layer purple moor grass which had been collected in summer Analysis of environmental material from the site has revealed important insights into the pyre material used to burn the body as well as providing important information about the environment in which the cist was constructed The unparalleled assemblage of organic objects has yielded insights into a range of materials which have not survived from the earlier Bronze Age elsewhere in southern Britain

A New Etruscan Archaeology Maurizio Forte, 2025 This book presents an overview of the most recent advancements in archaeological methods and technologies in the field of Etruscan archaeology aiming to move the discipline into a new era of technological innovation and multidisciplinary collaboration The book covers a wide range of topics including digital technologies for studying texts and inscriptions remote sensing technologies for understanding cityscapes and landscapes spatial analysis techniques for studying geopolitical patterns and urban configurations cognitive archaeology for exploring Etruscan funerary rituals conservation practices for preserving archaeological structures and paintings the application of neuroscience to study the aesthetic impact of Etruscan artifacts paleoenvironmental studies to understand the relationships between environment and society in ancient Etruria and a multidisciplinary approach to studying ancient textiles The final chapter introduces the field of generative artificial intelligence AI and its potential applications in Etruscan archaeology discussing the limitations and opportunities of AI in archaeological interpretation and the concept of the past as

a multiverse By embracing interdisciplinary approaches Etruscan archaeology can contribute to our understanding of the complex relationships between people their environment and the processes of urbanization mobility and historical development in ancient Italy and beyond Provided by publisher Europe's Barbarians AD 200-600 Edward James,2014-07-22 Barbarians is the name the Romans gave to those who lived beyond the frontiers of the Roman Empire the peoples they considered uncivilised Most of the written sources concerning the barbarians come from the Romans too and as such need to be treated with caution Only archaeology allows us to see beyond Roman prejudices and yet these records are often as difficult to interpret as historical ones Expertly guiding the reader through such historiographical complexities Edward James traces the history of the barbarians from the height of Roman power through to AD 600 by which time they had settled in most parts of imperial territory in Europe His book is the first to look at all Europe s barbarians the Picts and the Scots in the far north west the Franks Goths and Slavic speaking peoples and relative newcomers such as the Huns and Alans from the Asiatic steppes How did whole barbarian peoples migrate across Europe What were their relations with the Romans And why did they convert to Christianity Drawing on the latest scholarly research this book rejects easy generalisations to provide a clear nuanced and comprehensive account of the barbarians and the tumultuous period they lived through **The Competition of Fibres** Wolfram Schier,Susan Pollock,2020-04-30 The central issues discussed in this new collected work in the highly successful ancient textiles series are the relationships between fiber resources and availability on the one hand and the ways those resources were exploited to produce textiles on the other Technological and economic practices for example the strategies by which raw materials were acquired and prepared in the production of textiles play a major role in the papers collected here Contributions investigate the beginnings of wool use in western Asia and southeastern Europe The importance of wool in considerations of early textiles is due to at least two factors First both wild as well as some domesticated sheep are characterized by a hairy rather than a woolly coat This raises the question of when and where woolly sheep emerged a question that has not up to now been resolvable by genetic or other biological analyses Second wool as a fiber has played a major role both economically and socially in both western Asian and European societies from as early as the 3rd millennium BCE in Mesopotamia and it continues to do so in different ways up to the modern day Despite the importance of wool as a fiber resource contributors demonstrate clearly that its development and use can only be properly addressed in the context of a consideration of other fibers both plant and animal Only within a framework that takes into account historically and regionally variable strategies of procurement processing and the products of different types of fibers is it possible to gain real insights into the changing roles played by fibers and textiles in the lives of people in different places and times in the past With relatively rare albeit sometimes spectacular exceptions archaeological contexts offer only poor conditions of preservation for textiles As a result archaeologists are dependent on indirect or proxy indicators such as textile tools e g loom weights spindle whorls and the analysis of faunal remains to explore a range of such

proxies and methods by which they may be analyzed and evaluated in order to contribute to an understanding of fiber and textile production and use in the past *The Oxford Handbook of the European Bronze Age* Anthony Harding,Harry Fokkens,2013-06-27 The Oxford Handbook of the European Bronze Age is a wide ranging survey of a crucial period in prehistory during which many social economic and technological changes took place Written by expert specialists in the field the book provides coverage both of the themes that characterize the period and of the specific developments that took place in the various countries of Europe After an introduction and a discussion of chronology successive chapters deal with settlement studies burial analysis hoards and hoarding monumentality rock art cosmology gender and trade as well as a series of articles on specific technologies and crafts such as transport metals glass salt textiles and weighing The second half of the book covers each country in turn From Ireland to Russia Scandinavia to Sicily every area is considered and up to date information on important recent finds is discussed in detail The book is the first to consider the whole of the European Bronze Age in both geographical and thematic terms and will be the standard book on the subject for the foreseeable future
