The Languages of Civil Society Peter Wagner, 2006 The past two decades have witnessed a revival of the concept of civil society From East Central Europe to Latin America and East Asia to the recent calls for a European civil society and a global civil society the concept signifies the need for national and supra national forms of civic commitment against both unjustified state domination and neo liberal marketization Reviewing the long history of the concept its use in various regional contexts and its place in critical political theory this book takes comprehensive stock of these debates and

asks about the potential of the concept of civil society in guiding political transformations towards fuller understandings of liberty and democracy Third World Cities In Global Perspective David Alden Smith, 1996-02-08 In this innovative book David Smith ultimately links what happens on the ground in the neighborhoods where people live to the larger political and economic forces at work putting these connections in a historical framework and using a case study approach The societies of the world's underdeveloped countries are now undergoing an urban revolution that is drastically altering the fabric of their predominantly rural agrarian societies Smith takes the emerging political economy perspective on urbanization with its focus on global inequality and dependency as the context for city growth in the Third World This perspective allows Smith to critique the conventional ecological view of the city not by rejecting traditional analyses out of hand but by reformulating the crucial questions The conventional ecological perspective assumes an equilibrium model where very rapid city growth and the various types of urban imbalances are transitional phases on the path to modernity in contrast the comparative political economy approach conceptualizes uneven development and inequality as an inevitable result of the expansion of the capitalist world system
