year at the Jornada Caves in the Jornada del Muerto Swainson's hawks assemble daily to catch bats. The bats exit the caves actually lava tubes near sundown. The hawks swoop in and snatch bats from the air and eat them on the wing. Originally from France, Jean Luc Cartron has lived and worked on several continents finding his passion in the wide open spaces of New Mexico. He became fascinated by the birds of prey and has studied their ecology and conservation for nearly twenty years. Raptors of New Mexico will provide readers with a comprehensive treatment of all hawks, eagles, kites, vultures, falcons, and owls breeding or wintering in New Mexico or simply migrating through the state. This landmark study is also beautifully illustrated with more than six hundred photographs including the work of more than one hundred photographers and more than twenty species distribution maps. **General Technical Report NC.** ,1981 **Owls** Kim Long,1998 An illustrated presentation of owl behavior, biology, and individual characteristics.
