North American Suburbs John Kramer,1972 *North American Suburbs* John Kramer,1972 **North American Suburbs** John Kramer,1972 **The Life of the North American Suburbs** Jan Nijman,2020-02-28 This is the first comprehensive look at the role of North American suburbs in the last half century departing from traditional and outdated notions of American suburbia Racial and Ethnic Politics in American Suburbs Lorrie Frasure-Yokley,2015-12-11 Racial and Ethnic Politics in American Suburbs examines racial and ethnic politics outside traditional urban contexts and questions the standard theories we use to understand mobility and government responses to rapid demographic change and political demands This study moves beyond traditional scholarship in urban politics departing from the persistent treatment of racial dynamics in terms of a simple black white binary Combining an interdisciplinary multi method and multiracial approach with a well integrated analysis of multiple forms of data including focus groups in depth interviews and census data Racial and Ethnic Politics in American Suburbs explains how redistributive policies and programs are developed and implemented at the local level to assist immigrants racial ethnic minorities and low income groups something that given earlier knowledge and theorizing should rarely happen Lorrie Frasure Yokley relies on the framework of suburban institutional interdependency SII which presents a new way of thinking systematically about local politics within the context of suburban political institutions in the United States today **Cities, Politics, and Policy** John P. Pelissero,2002-10-01 Just because Milwaukee isn't Manhattan doesn't mean that those urban centers face completely unique challenges Through effective comparative analysis of key issues in urban studies how city managers share power with mayors how spending policies affect economic development and how school politics impact education policy students can clearly see how scholars discern patterns and formulate conclusions to offer theoretical and practical insights from which all cities can benefit Pelissero brings together an impressive team of contributors to explore variation among cities through case studies and cross sectional analyses Each author synthesizes the field's seminal literature while explaining how urban leaders and their constituents grapple with everything from city council politics to conflict and cooperation among minority groups Authors identify both key trends and gaps in the scholarship and help set the research agenda for the years to come Lively case material will hook your students while the accessible presentation of empirical evidence make this reader the comprehensive and sophisticated text you demand **Fenced Off** Juliet F. Gainsborough,2001-03-02 Since the 1980s a distinctive suburban politics has emerged in the United States Juliet F Gainsborough argues in Fenced Off As suburbs have become less economically and socially dependent on the central cities suburban and urban dwellers have diverged not only in their voting patterns but also in their thinking about national politics While political reporters have long noted this difference few quantitative studies have been conducted on suburbanization alone above and beyond race or class as a political trend Using census and public opinion statistics along with data on congressional districts and party platforms Gainsborough demonstrates that this ideology of

localism weakens when suburbs experience city like problems and strengthens when racial and economic differences with the nearby city increase In addition Gainsborough uses national survey data from the 1950s to the 1990s to show that a separate suburban politics has arisen only during the last two decades Further she argues the political differences between urban and suburban voters have found expression in changes in congressional representation and new electoral strategies for the major political parties As Congressional districts become increasingly suburban soccer moms and liveability agendas come to dominate party platforms and the needs of the urban poor disappear from political debate Fenced Off uses the tools of political science to prove what political commentators have sensed that the suburbs offer a powerful voting bloc that is being courted with sophisticated new strategies

US Economic History Since 1945 Michael French,1997 Since 1945 the US economy has evolved from an expanding consumer society in which affluence was more widely distributed than ever before Mike French s volume examines the principal economic developments and social changes in the US since 1945 including those in business regional dynamics protest movements and population distribution Social movements based on the civil rights demands of African Americans ethnic minorities and women are also examined The elements of continuity to pre 1945 trends and the points of departure notably in the post 1970 period are discussed to provide a more complete examination than previously available

Politics of the Periphery Pierre Hamel,2024-01-31 New urban forms characterizing contemporary metropolises reflect a certain continuity with the patterns of the past They also include unexpected forms of settlement and design that have emerged in response to social and economic needs and as a way of leveraging new technologies Politics of the Periphery sets out to explore sub urban governance in diverse contexts in order to better understand how materiality and space are shaped by the possibilities and constraints of confronting actors This collection edited by Pierre Hamel examines the empirical aspects of collective action and planning in eight urban regions around the world across North America Europe Asia and Africa and reveals the impacts and consequences of various structures of suburban governance The case studies feature a diverse range of local actors facing both the specificity of their respective milieus and the broader context of extended urbanization as metropolitan regions cope with new territorial challenges The book focuses on suburbanization processes that characterize most of these post metropolitan regions and questions whether it is possible to improve suburban governance in the face of growing uncertainties arising from structural and subjective transformations Paying close attention to the relationship between the local and the global Politics of the Periphery challenges the planning processes of evolving metropolitan regions

[Environmental Justice in America](#) Edwardo Lao Rhodes,2005-02-15 Edwardo Lao Rhodes examines the issue of environmental justice as a public policy concern

and suggests the use of a new methodology in its evaluation Rather than argue the merits of growth versus environmental protection he makes the case that race and class were not major concerns of environmental policy until the 1990s

Technically Together Taylor Dotson,2024-02-06 Why we should not accept networked individualism as the inevitable future of community If social interaction by social media has become the modern front porch as one sociologist argues offering richer and more various contexts for community and personal connection why do we often feel lonelier after checking Facebook For one thing as Taylor Dotson writes in Technically Together Try getting a Facebook status update to help move a couch or stay for dinner Dotson argues that the experts who assure us that networked individualism will only bring us closer together seem to be urging citizens to adapt their social expectations to the current limits of technology and discouraging them from considering how technologies could be refashioned to enable other ways of relating and belonging Dotson characterizes different instantiations of community as thick or thin depending on the facets and manifestations of togetherness that they encompass Individuating social networks are a form of community he explains but relatively thin in regard to several dimensions of communality Dotson points out that current technological practices are not foreordained but supported by policies economic arrangements and entrenched patterns of thought He examines a range of systems organizations and infrastructures from suburban sprawl and smartphones to energy grids and cry it out sleep training for infants and considers whether they contribute to the atomization of social life or to togetherness and community vibrancy Dotson argues that technology could support multifaceted communities if citizens stopped accepting the technological status quo and instead demanded more from their ever present devices
