North American Suburbs Politics Diversity And Change:

North American Suburbs John Kramer,1972 *North American Suburbs* John Kramer,1972 **Fenced Off** Juliet F. Gainsborough,2001-03-02 Since the 1980s a distinctive suburban politics has emerged in the United States Juliet F Gainsborough argues in *Fenced Off* As suburbs have become less economically and socially dependent on the central cities suburban and urban dwellers have diverged not only in their voting patterns but also in their thinking about national politics While political reporters have long noted this difference few quantitative studies have been conducted on suburbanization alone above and beyond race or class as a political trend Using census and public opinion statistics along with data on congressional districts and party platforms Gainsborough demonstrates that this ideology of localism weakens when suburbs experience city like problems and strengthens when racial and economic differences with the nearby city increase In addition Gainsborough uses national survey data from the 1950s to the 1990s to show that a separate suburban politics has arisen only during the last two decades Further she argues the political differences between urban and suburban voters have found expression in changes in congressional representation and new electoral strategies for the major political parties As Congressional districts become increasingly suburban soccer moms and liveability agendas come to dominate party platforms and the needs of the urban poor disappear from political debate *Fenced Off* uses the tools of political science to prove what political commentators have sensed that the suburbs offer a powerful voting bloc that is being courted with sophisticated new strategies *North American Suburbs* John Kramer,1972 *US Economic History Since 1945* Michael French,1997 Since 1945 the US economy has evolved from an expanding consumer society in which affluence was more widely distributed than ever before Mike French s volume examines the principal economic developments and social changes in the US since 1945 including those in business regional dynamics protest movements and population distribution Social movements based on the civil rights demands of African Americans ethnic minorities and women are also examined The elements of continuity to pre 1945 trends and the points of departure notably in the post 1970 period are discussed to provide a more complete examination than previously available *The Life of North American Suburbs* Jan Nijman,2020-02-24 This book chronicles and explains the role of suburbs in North American cities since the mid twentieth century Examining fifteen case studies from New York to Vancouver Atlanta to Chicago Montreal to Phoenix *The Life of North American Suburbs* traces the insightful connection between the evolution of suburbs and the cultural dynamics of modern society Suburbs are uniquely significant spaces their creation and evolution reflect the shifting demographics race relations modes of production cultural fabric and class structures of society at large The case studies investigate the place of suburbs within their wider metropolitan constellations the crucial role they play in the cultural economic political and spatial organization of the city Together the chapters paint a compelling portrait of North American cities and their dynamic suburban landscapes

Environmental Justice in America Edwardo Lao Rhodes,2005-02-15 Edwardo Lao Rhodes examines the issue of

environmental justice as a public policy concern and suggests the use of a new methodology in its evaluation Rather than argue the merits of growth versus environmental protection he makes the case that race and class were not major concerns of environmental policy until the 1990s

Technically Together Taylor Dotson,2024-02-06 Why we should not accept networked individualism as the inevitable future of community If social interaction by social media has become the modern front porch as one sociologist argues offering richer and more various contexts for community and personal connection why do we often feel lonelier after checking Facebook For one thing as Taylor Dotson writes in Technically Together Try getting a Facebook status update to help move a couch or stay for dinner Dotson argues that the experts who assure us that networked individualism will only bring us closer together seem to be urging citizens to adapt their social expectations to the current limits of technology and discouraging them from considering how technologies could be refashioned to enable other ways of relating and belonging Dotson characterizes different instantiations of community as thick or thin depending on the facets and manifestations of togetherness that they encompass Individuating social networks are a form of community he explains but relatively thin in regard to several dimensions of communality Dotson points out that current technological practices are not foreordained but supported by policies economic arrangements and entrenched patterns of thought He examines a range of systems organizations and infrastructures from suburban sprawl and smartphones to energy grids and cry it out sleep training for infants and considers whether they contribute to the atomization of social life or to togetherness and community vibrancy Dotson argues that technology could support multifaceted communities if citizens stopped accepting the technological status quo and instead demanded more from their ever present devices

Transforming Race and Class in Suburbia T. Vicino,2008-06-09 Just as the nation witnessed the widespread decay of urban centers there is a mounting suburban crisis in first tier suburbs the early suburbs to develop in metropolitan America These places once the bastion of a large middle class have matured and experienced three decades of social and economic decline In the first comprehensive analysis of suburban decline for an entire region Vicino uses Baltimore as an illustrative case to chronicle how first tier suburbs experienced widespread decline while outer suburbs flourished since the 1970s At the brink of the twenty first century Vicino illustrates how the processes of deindustrialization racial diversity and class segregation have shaped the evolution of suburban decline

Cities, Politics, and Policy John P. Pelissero,2002-10-01 Just because Milwaukee isn't Manhattan doesn't mean that those urban centers face completely unique challenges Through effective comparative analysis of key issues in urban studies how city managers share power with mayors how spending policies affect economic development and how school politics impact education policy students can clearly see how scholars discern patterns and formulate conclusions to offer theoretical and practical insights from which all cities can benefit Pelissero brings together an impressive team of contributors to explore variation among cities through case studies and cross sectional analyses Each author synthesizes the field's seminal literature while explaining how urban leaders and their constituents grapple with

everything from city council politics to conflict and cooperation among minority groups Authors identify both key trends and gaps in the scholarship and help set the research agenda for the years to come Lively case material will hook your students while the accessible presentation of empirical evidence make this reader the comprehensive and sophisticated text you demand

Living With Energy Shortfall Jon Van Til,2019-04-16 This book is about the ways Americans may live in the years ahead and the forms their cities suburbs towns and rural areas may take in the light of changing patterns of energy supply and societal affluence It is written for the ultimate energy policy maker the private citizen

The City Alan S. Berger,1978

Suburban Landscapes Paul H. Mattingly,2001-12-20 In this work Paul Mattingly provides a model for understanding suburban development through his narrative history of Leonia New Jersey an early commuter suburb of New York City

Dreaming Suburbia Amy Maria Kenyon,2004 A multifaceted cultural study of suburbanization in the United States and Detroit in particular during the postwar suburban boom Dreaming Suburbia is a cultural and historical interpretation of the political economy of postwar American suburbanization Questions of race class and gender are explored through novels film television and social criticism where suburbia features as a central theme Although suburbanization had important implications for cities and for the geo politics of race critical considerations of race and urban culture often receive insufficient attention in cultural studies of suburbia This book puts these questions back in the frame by focusing on Detroit Dearborn and Ford history and the local suburbs of Inkster and Garden City Covering such topics as the political and cultural economy of suburban sprawl the interdependence of city and suburb and local acts of violence and crises during the 1967 riots the text examines the making of a physical place its cultural effects and social exclusions The perspectives of cultural history American studies social science and urban studies give Dreaming Suburbia an interdisciplinary appeal
