in a significant reduction in volume and destroy gaseous and liquid waste streams leaving little or no residues beyond those linked to flue gas neutralization and treatment Moreover waste incineration sterilizes and destroys putrescible matter and produces usable heat Incineration Technologies first appeared as a peer reviewed contribution to the Encyclopedia of Sustainability Science and Technology It provides detailed treatment of the challenges of this technically complex process which requires huge investment and operating costs as well as good technical skills in maintenance and plant operation Particular attention is paid to technologies for ensuring the complete burn out of flue gas and residues and for controlling the resulting pollutants
