Nemeth,2011-11-16 In order to fully grasp criminal law concepts students must go beyond mere rote memorization of the penal code and attempt to understand where the laws originate from and how

they have developed Criminal Law Second Edition blends legal and moral reasoning in the examination of crimes and explores the history relating to jurisprudence and roots of criminal law It fosters discussions of controversial issues and delivers abridged case law decisions that target the essence of appellate rulings Grounded in the model penal code making the text national in scope this volume examines Why the criminal codes originated and the moral religious spiritual and human influences that led to our present system How crimes are described in the modern criminal justice model The two essential elements necessary for criminal culpability actus reus the act committed or omitted and mens rea the mind and intent of the actor Offenses against the body resulting in death including murder manslaughter felony murder and negligent homicide Nonterminal criminal conduct against the body including robbery kidnapping false imprisonment assault and hate crimes Sexual assault rape necrophilia incest and child molestation Property offenses such as larceny theft bribery forgery and embezzlement Crimes against the home including burglary trespass arson and vandalism The book also examines controversial public morality issues such as prostitution drug legalization obscenity and pornography The final two chapters discuss inchoate offenses where the criminal act has not been completed and various criminal defenses such as legal insanity entrapment coercion self defense and mistake of fact or law Important keywords introduce each chapter and discussion questions and suggested readings appear at the end of each chapter prompting lively debate and further inquiry into a fascinating subject area that continues to evolve

Cyclopedia of Law and Procedure ,1908 China and

International Human Rights Na Jiang,2013-12-12 This book is designed to introduce law students legal actors and human rights activists particularly participants in human rights dialogues with China to the process and reality of a newly confident China s participation in the international human rights system albeit with inherent challenges From an international and comparative perspective one of the key findings of the author s research is that progress towards human rights depends more on judges than on legislators Chinese legislators have enacted a series of reforms in order to better protect human rights Unfortunately these reforms have not led to greater adherence to China s international human rights obligations in practice The reforms failed because they have generally been misunderstood by Chinese judges who often have a limited understanding of international human rights norms Specifically this book will examine how judicial misunderstandings have blocked reforms in one specific area the use of severe punishments based on international human rights theory and case studies and data analyses This examination has several purposes The first is to suggest that China ratify the ICCPR as the next step for its substantive progress in human rights and as a good preparation for its re applying to be a member of the UN Human Right Council in the future The second is to explain how judges could be better educated in international human rights norms so as to greatly reduce the use of severe punishments and better comply with China s human rights obligations The third is to demonstrate how the international community could better engage with China in a manner that is more conducive to human rights improvements The author s ultimate goal is to enhance dialogue on human rights in China

between judges and the Chinese government between Chinese judges and their foreign counterparts and between China's government and the international community Another significant aim of this book is to clarify the controversial question of what obligations China should undertake before its ratification of the ICCPR and to re-examine trends in its developing human rights policy after standing down from the Council in late 2012 The tortuous progress of China's criminal law and criminal justice reforms has confirmed that Chinese judges need further instruction on how to apply severe punishments in a manner consistent with international standards Judges should be encouraged to exercise more discretion when sentencing so that penalties reflect the intent of relevant domestic laws as well as the international human rights standards enumerated in the ICCPR In order to better educate and train judges this book contains introductory chapters that examine the severe punishments currently available to Chinese judges from an international human rights perspective To illustrate how Chinese justice currently falls short of international norms this paper also examines several cases that are considered to be indicative of China's progress towards greater respect for human rights and the rule of law These cases demonstrate that China still has a long way to go to achieve its goals at least before abolishing the death penalty forced labor and torture
