North Country Bishop Francis Godwin James, 1956 **North Country Bishop, a Biography of William Nicolson,**
by Francis Godwin James Francis Godwin James, 1956 *North Country Bishop* Francis Godwin James, 1956 **Beyond**
Liberty and Property J. Gunn, 1983-07-01 The themes explored include political liberty legal tyranny defences of influence
in government recognition of the Opposition and the development of organic categories of political analysis the latter in a
chapter that explodes the association often presumed between organicism and conservative modes of thought A chapter on
the Fourth Estate examines the gradual process of legitimation of interests culminating in the influence of the press Central
to the account of new political forces and their recognition is the idea of public opinion which evolved during this period from
the notion of public spirit Chapters on the classical legacy of the century and on the High Tories examine two backward
looking aspects of the political culture Tracing the persistent influence of High Toryism Gunn questions the conventional
wisdom about eighteenth century ideological consensus in general and Whig solidarity in particular He demonstrates that
theories of government from the seventeenth century survived to a degree not previously admitted by modern scholarship

Protestant Ireland 1660-1760 S. J. Connolly, 1992-07-02 This is a study of religion politics and society in a period of great

significance in modern Irish history The late seventeenth and early eighteenth centuries saw the consolidation of the power of the Protestant landed class the enactment of penal laws against Catholics and constitutional conflicts that forced Irish Protestants to redefine their ideas of national identity S J Connolly's scholarly and wide ranging study examines these developments and sets them in their historical context The Ireland that emerges from his lucid and penetrating analysis was essentially a part of ancien régime Europe a pre industrialized society in which social order depended less on a ramshackle apparatus of coercion than on complex structures of deference and mutual accommodation along with the absence of credible challengers to the dominance of a landed elite in which the ties of patronage and clientship were often more important than horizontal bonds of shared economic or social position and in which religion remained a central part of personal and political motivation

The Pillars of Priestcraft Shaken J. A. I. Champion, 1992-03-12 First published in 1992 this book examines the intellectual confrontation between priest and Freethinker from 1660 to 1730 and the origins of the early phase of the Enlightenment in England Through an analysis of the practice of historical writing in the period Champion maintains that historical argument was a central component for displaying defences of true religion Taking religion and specifically defences of the Church of England after 1660 as central to the politics of the period the first two chapters of the book explore the varieties of clericalist histories arguing that there were rival emphases upon regnum or sacerdos as the font of true religion The remainder of the book examines how radical Freethinkers like John Toland or the third Earl of Shaftesbury set about attacking the corrupt priestcraft of established religion but also importantly promoted a reforming civil theology

Small Dictionaries and Curiosity John P. Considine, 2017 Small Dictionaries and Curiosity tells a story which has not been told before that of the first European wordlists of minority and unofficial languages and dialects from the end of the Middle

Ages to the early nineteenth century These wordlists were collected by people who were curious about the unrecorded or little known languages they heard around them Between them they document more than 40 language varieties from a Basque Icelandic pidgin of the North Atlantic to the Kalmyk language of the lower Volga The book gives an account of about 90 of these dictionaries and wordlists some of them single page jottings and some of them full sized printed books paying attention to their content and their physical form alike It explores the kinds of curiosity and imagination by which their makers were moved the lover of all languages hearing new voices in an inn the speaker of a dying language recording his linguistic memories the patriot deploying his lexicographical findings in the service of an emerging nation It offers an encounter with the diverse voices of the entirety of post medieval Europe turning away from the people of the courts and universities whose language was documented in big dictionaries to listen to people who did not speak the languages of power the people of remote places and dying communities the illiterate poor settled or homeless migrants from the edges of Europe and beyond

Render Unto Caesar R. Barry Levis, 2022-06-30 Before Queen Anne s reign had even begun rival factions in both Church and State were jostling for position in her court Attempting to follow a moderate course the new monarch and her advisors

had to be constantly wary of the attempts of extremists on both sides to gain the upper hand. The result was a see-saw period of alternating influence that has fascinated historians and political commentators. In this engaging new study Barry Levis shows that although both parties claimed to be in support of the Church, their real aim was advancing their respective political positions. Uniting close analysis of Queen Anne's changing policies towards dissenters, occasional conformity and church appointments with studies of the careers of several prominent churchmen and politicians, Levis paints a gripping picture of competing religious values and political ambitions. Most significantly, he shows that far from being restricted to the church and political elites, these conflicts were to have a cascading influence on the division of the country long after the Queen's reign ended.

A Chorus of Grammars George Hickes, 1992 **Northumbria** Robert Colls, 2019-02-26

The North East is probably England's most distinctive region. A place of strong character with a very special sense of its past, it is as William Hutchinson remarked in 1778, 'truly historical ground'. This is a book about both the ancient Anglian kingdom of Northumbria, which stretched from the Humber to the Scottish border, and the ways in which the idea of being a Northumbrian or a northerner or someone from the North East persisted in the area long after the early English kingdom had fallen. It examines not only the history of the region but also the successive waves of identity that that history has bestowed over a very long period of time. Successful nations write about themselves in these terms, so why not regions? Northumbria existed before England began but is still with us in name and in the way we think about ourselves. A series of sections entitled Christian Kingdom, Borderland and Coalfield, New Northumbria, Cultural Region and Northumbrian Island explore the region on the grand scale from the very beginning and bring a sharp sense of history to bear on the various threads that have influenced the making of modern regional identity. The book is a work of exceptional scholarship. Never before have so many acclaimed historians addressed together the issues which have affected this special region. Clearly written and rich in ideas, chapters explore the physical origins of Northumbria and consider just how the pressing political and military claims of adjoining states shaped and tempered it. There are further chapters on art, music, mythology, dialect, history, economy, poetry, politics, religion, antiquarianism, literature and settlement. They show how Northumbrians have lived and died and looked forward and back, and these accounts of the North East's past will surely help in the shaping of its future.
