Japan and International Law, Past, Present and Future Nisuke Ando, 2023-12-11 This book is a record of the international symposium held at the Kyoto International Conference Hall to mark the centennial of the Japanese Association of International Law The purpose of the symposium was to reflect on past Japanese practice to analyze current problems affecting Japan and to seek to clarify the future role of Japan in the global community in terms of international law After joining the international community in the middle of the nineteenth century Japan adopted a policy of wealth creation and armament in order to maintain its independence against the expanding Western States At the same time on the domestic scene Japan vigorously promoted the modernization Westernization of its political economic and social institutions Japan emerged as one of the victorious Principal Allied and Associated Powers in World War I and started asserting its place in the international order However in the aftermath of the Great Depression Japan failed to reach agreement with the international community eventually left the League of Nations invaded the Asian continent and met with complete military defeat in World War II In the subsequent years Japan toiled to rebuild its economy and to rejoin the world community but despite its miraculous economic recovery and expansion Japan remains ambivalent in its policy of contributing to the maintenance of international peace and security During these one and a half centuries the Japanese practice of international law has covered a wide range of fields From these various fields the symposium took up three specific topics War and Peace Economy and Human Rights because of their relevance to past Japanese practice and because future Japanese practice in these areas would be bound to affect international law in the coming century In addition the symposium discussed Japanese transactions in general with international law The period covered by the symposium has witnessed many drastic changes in the world and international law which used to be applied almost exclusively to relations among the Western States has now come to be applied universally The Association wished to emphasize that an analysis of Japanese practice should be of significance for anyone interested in promoting and consolidating the rule of law in the world community at large [The International Relations of Northeast Asia](#) Samuel S. Kim, 2004 Written by a team of leading scholars this volume presents a variety of theoretical perspectives and case studies to offer a comprehensive analysis of the pressures that shape the policy choices of China Russia Japan the United States North and South Korea and Taiwan **Critical security in the Asia-Pacific** Anthony

Burke, Matt McDonald, 2021-06-15 In the wake of 9 11 the Asian crisis and the 2004 tsunami traditional analytical frameworks are increasingly unable to explain how individuals and communities are rendered insecure or advance individual global or environmental security In the Asia Pacific the accepted wisdom of realism has meant that analyses rarely move beyond the statist militarist and exclusionary assumptions that underpin traditional realpolitik This innovative new book challenges these limitations and addresses the missing problems people and vulnerabilities of the Asia Pacific region It also turns a critical eye on traditional interstate strategic dynamics Critical security in the Asia Pacific applies both a critical theoretical approach that interrogates the deeper assumptions underpinning security discourses and a human centred policy approach that focuses on the security welfare and emancipation of individuals and communities Leading Asia Pacific researchers combine to apply these frameworks to the most pressing issues in the region from the Korean peninsula to environmental change Indonesian conflict the war on terror and the plight of refugees The result is a sophisticated and accessible account of often neglected realities of marginalization in the region and a compelling argument for the empowerment and security of the most vulnerable

Security, Arms Control and Defence Restructuring in East Asia

Bjørn Møller, 2019-01-22 First published in 1998 this volume examines East Asia especially Northeast Asia which has been a region of considerable political security of importance for several key reasons It features several great and medium powers China Japan and Russia as well as North and South Korea Even though no arms race is yet discernible among these states with the partial exception of the two Koreas it is conceivable that one might commence If it did the level of militarization could become quite alarming if only because of the tremendous and rapidly growing economic potential of the regional states Even though relations among regional states except the two Koreas are currently peaceful the region features several unresolved issues e g concerning territory and a historical legacy of enmity between several states To prevent such conflicts of interest from erupting into armed conflict is of the utmost importance A stabilizing factor is that the military potentials in the region are still predominantly defensively oriented i e most states lack the requisite power projection or invasion capabilities to inflict serious harm on each other However this might change in the not so distant future Hence the importance of confidence building measures of an institutionalization of regional relations and of a strengthening of commitments to defensive military strategies and postures

Chinese Energy Security Ryan Clarke, 2010 This monograph examines the dynamics of China's energy security dilemma and the role of the People's Liberation Army Navy PLAN Following this PLAN development is discussed and its future role in regional security is hypothesized This report argues that it is domestic market inefficiencies and poor management practices that pose the greatest threat to China's energy security Further less and less of Chinese energy imports are making their way to the country by sea thus the PLAN actually has a minimal role to play Given these realities Chinese fears of a naval blockade that deprives it of energy supplies as well as American confidence that this is a realistic strategic option in the event of hostilities are implausible In addition Beijing's

desire to develop aircraft carriers and other high tech naval capabilities combined with its contribution to the anti piracy mission in the Gulf of Aden have led many analysts to erroneously conclude that China seeks to engage in global power projection like the United States However the focus of the PLAN will remain regional and on asymmetric capabilities namely the effective use of submarines and other undersea devices that ultimately seek to deter American and possible Japanese involvement in a conflict over Taiwan and or in the South China Sea such as the Spratly Islands which China views as inalienable parts of its territory Although China s interests are expanding and becoming more international in nature recovering from the century of humiliation and ensuring domestic legitimacy remain the top priorities of China s leadership P

vii **The Unraveling of Island Asia?** Bruce Vaughn, 2002-04-30 This edited collection takes a primary focus on security issues in Oceania but here the word security is expanded to include such topics as domestic Indonesian and Philippine instability environmental degradation the work of international crime syndicates the generic problem of post colonial state failure and the always overhanging concern with China in short all of the significant troubles roiling Island Asia today Using this expanded notion of security and stability the volume pulls in new anxieties about global warming which may submerge half of the South Pacific microstates within the next 30 years and pollution which covers Indonesia and Malaysia in thick smoke now visible from space as well as traversing the more traditional security and economic issues Vaughn and his contributors describe a 7 000 mile swath of wobbly island states ranging from the world s fourth most populous country to tiny bogus sovereignties in thrall to globalized criminals through which more than 1 trillion worth of goods move each year An important resource for scholars students researchers and policy makers involved with Oceania and Asian studies as well as contemporary geo political concerns **North Korea and Northeast Asian Regional Security** Simon Xu-Hui

Shen, 2016-04-14 With its unstable and intermittent nuclear weapon project and the recent leadership succession issue Democratic People s Republic of Korea DPRK has been a source of insecurity for the past decade in this region in addition to the delicate international relations among the powerful China United States Japan and Russia The essence of DPRK issue lies in the instability and uncertainty of nuclear development that even the slightest miscalculation by any one power could disturb the sensitive balance of relationships creating a butterfly effect with a catastrophic result Drawing on various perspectives on the interaction over DPRK and other regional powers this volume seeks to explore the role of DPRK in Northeast Asia and its implication to regional security as a whole The volume does not confirm a particular position over DPRK s nuclear showdown rather it invites scholars to provide assessments from the viewpoints of neighbouring powers in order to present a more complete understanding of the leading issue in Northeast Asia The volume will serve as an invaluable resource for policymakers students and scholars of North Korean politics and international relations This book was published as a special issue of the Journal of Comparative Asian Development Regional Financial Cooperation of Northeast Asia in Era 21st □□□, 2006 **Inauspicious Beginnings** Université du Québec à Montréal. Centre d'études des politiques

étrangères et de sécurité, Raoul-Dandurand Chair of Strategic and Diplomatic Studies, 2004 Inauspicious Beginnings shows that at the end of the Cold War many experts in the international community expected a new world order to emerge in which international security institutions such as the United Nations Security Council and NATO would play a major role in preventing and ending conflicts But while the 1990s proved to be a decade of international insecurity and major humanitarian disasters thus demonstrating the need for a wider and more efficient system of security institutions the principal powers failed to create them Instead the emerging order was marked by the overwhelming power of the United States which under the Bush Sr and Clinton administrations did not see such a system as a necessity The authors detail how the Bush and Clinton administrations relied on catering to allies and building large coalitions to deal with major international security challenges while other principal powers were either pre occupied with their domestic problems or deferred to the United States As a consequence on the eve of 11 September 2001 the United Nations Security Council remained an older outmoded power configuration incapable of responding efficiently to the with novel challenges besetting it Its relevance has been further questioned by the unilateral occupation of Iraq by the United States

Asia's Regional Architecture Andrew Yeo, 2019-04-02 During the Cold War the U S built a series of alliances with Asian nations to erect a bulwark against the spread of communism and provide security to the region Despite pressure to end bilateral alliances in the post Cold War world they persist to this day even as new multilateral institutions have sprung up around them The resulting architecture may aggravate rivalries as the U S China and others compete for influence However Andrew Yeo demonstrates how Asia s complex array of bilateral and multilateral agreements may ultimately bring greater stability and order to a region fraught with underlying tensions Asia s Regional Architecture transcends traditional international relations models It investigates change and continuity in Asia through the lens of historical institutionalism Refuting claims regarding the demise of the liberal international order Yeo reveals how overlapping institutions can promote regional governance and reduce uncertainty in a global context In addition to considering established institutions such as the Association of Southeast Asian Nations and the Asia Pacific Economic Cooperation he discusses newer regional arrangements including the East Asia Summit Trans Pacific Partnership and the Belt and Road Initiative This book has important implications for how policymakers think about institutional design and regionalism in Asia and beyond
