Northeast Asias Stunted Regionalism:

Northeast Asia's Stunted Regionalism Gilbert Rozman, 2004-06-21 A comprehensive picture of the pursuit of regionalism across Northeast Asia in the years following the Cold War

North Korea and Northeast Asian Regional Security Simon Xu-Hui Shen, 2016-04-14 With its unstable and intermittent nuclear weapon project and the recent leadership succession issue Democratic People's Republic of Korea DPRK has been a source of insecurity for the past decade in this region in addition to the delicate international relations among the powerful China United States Japan and Russia The essence of DPRK issue lies in the instability and uncertainty of nuclear development that even the slightest miscalculation by any one power could disturb the sensitive balance of relationships creating a butterfly effect with a catastrophic result Drawing on various perspectives on the interaction over DPRK and other regional powers this volume seeks to explore the role of DPRK in Northeast Asia and its implication to regional security as a whole The volume does not confirm a particular position over DPRK's nuclear showdown rather it invites scholars to provide assessments from the viewpoints of neighbouring powers in order to present a more complete understanding of the leading issue in Northeast Asia The volume will serve as an invaluable resource for policymakers students and scholars of North Korean politics and international relations This book was published as a special issue of the Journal of Comparative Asian Development

China's Rise and Regional Integration in East Asia Yong Wook Lee, Key-young Son, 2014-03-05 With featuring far reaching diversities and disparities among the regional states in their political economic and social systems and cultural and religious orientations East Asia is a microcosm of international society at large Nevertheless there are unique dynamics unfolding in East Asia at the turn of the twenty first century namely the rise of China as a contender for regional and global hegemony and a set of collective initiatives to integrate the region into a harmonious community This book provides new arguments on China's rise and the transformation of East Asia and analyzes the foreign policy behavior of the regional states and relations among them In doing so the contributors show why and how China is rising and how China's rise shapes the emerging regional structures and institutions in East Asia Furthermore given the East Asian context where the world's second and third largest economies coexist with much smaller states and with China's ascendancy likely to continue this book challenges the pervasive dichotomy of hegemony and community This allows for a fuller and more nuanced account of China's role and the shifting regional policies in East Asia in which hegemonic cooperation does not necessarily lead to a hegemonic form of regional order Presenting strategic political economic and historical perspectives on China's changing role in the region and the development of regionalism China's Rise and Regional Integration in East Asia will be of great interest to students and scholars of Chinese politics Asian politics international relations and regionalism

Institutionalizing Northeast Asia Martina Timmermann, Jitsuo Tsuchiyama, 2008 Globalization and China's growing economy have caused different economic growth rates resulting in constant fluctuations in the balance of power among the nations of Northeast Asia This publication

explores regional institutionalism as a counterweight to the principle of sovereignty It argues that cooperation through regional institution building is the best way to deal with the growing intertwinement of global issues and developments and the needs and interests at the regional and national levels A unified region could also answer the demand for supra territorial policy responses to such issues as trade finance the environment human rights and human security Publisher s description

The Making of Northeast Asia Kent Calder, Min Ye, 2010-08-16 Northeast Asia where the interests of three major nuclear powers and the world s two largest economies converge around the unstable pivot of the Korean peninsula is a region rife with political economic paradox It ranks today among the most dangerous areas on earth plagued by security problems of global importance including nuclear and missile proliferation Yet despite its insecurity the region has continued to be the most rapidly growing on earth for over five decades and it is emerging as an identifiable economic political and strategic region in its own right As the locus of both economic growth and political military uncertainty in Asia has moved further to the Northeast a need has developed for a book that focuses analytically on prospects for Northeast Asian cooperation within the context of both Asia and the Asia Pacific regional relationship This book does exactly that while also offering a more general theory for Asian institution building *Asia's Regional Architecture* Andrew Yeo, 2019-04-02 During the Cold War the U S built a series of alliances with Asian nations to erect a bulwark against the spread of communism and provide security to the region Despite pressure to end bilateral alliances in the post Cold War world they persist to this day even as new multilateral institutions have sprung up around them The resulting architecture may aggravate rivalries as the U S China and others compete for influence However Andrew Yeo demonstrates how Asia s complex array of bilateral and multilateral agreements may ultimately bring greater stability and order to a region fraught with underlying tensions Asia s Regional Architecture transcends traditional international relations models It investigates change and continuity in Asia through the lens of historical institutionalism Refuting claims regarding the demise of the liberal international order Yeo reveals how overlapping institutions can promote regional governance and reduce uncertainty in a global context In addition to considering established institutions such as the Association of Southeast Asian Nations and the Asia Pacific Economic Cooperation he discusses newer regional arrangements including the East Asia Summit Trans Pacific Partnership and the Belt and Road Initiative This book has important implications for how policymakers think about institutional design and regionalism in Asia and beyond *The Future of East Asia* Peter Hayes, Chung-In Moon, 2017-12-04 This book collects some of the most influential scholars in international relations who focus on Asia globally in exploring the challenges of diplomacy faced in Asia as US policy drastically changes The president elect has suggested policies which if implemented would radically transform the way that the region functions what will this mean in practice China s government is also retrenching nationalist positions what is the future of China and what does that mean for the region A wide range of distinguished scholars concerned about the future have contributed their thoughts in an attempt to spark a global dialogue **China Into**

the Hu-Wen Era John Wong, Hongyi Lai, 2006 This volume is an updated survey and assessment of the recent policy initiatives of Hu Jintao and Wen Jiabao which have come to be known as the Hu Wen s New Deal Individual chapters are written by scholars from different academic disciplines and backgrounds These scholars hail from Singapore the United States Australia Korea Hong Kong Taiwan and Mainland China Topics cover the patterns and process of leadership succession emerging political factions social unrest sources of economic growth income disparities social security reform land use policy banking reform corporate governance labor and population policies rule of law and changes in the Party and ideology On the external aspects discussion includes China s changing relations with the U S Japan and ASEAN In many ways the Hu Wen leadership today is still coming to grips with the same issues and problems as discussed in this book

Remapping East Asia T. J. Pempel, 2018-08-06 An overarching ambiguity characterizes East Asia today The region has at least a century long history of internal divisiveness war and conflict and it remains the site of several nettlesome territorial disputes However a mixture of complex and often competing agents and processes has been knitting together various segments of East Asia In Remapping East Asia T J Pempel suggests that the region is ripe for cooperation rather than rivalry and that recent region building developments in East Asia have had a substantial cumulative effect on the broader canvas of international politics This collection is about the people processes and institutions behind that region building In it experts on the area take a broad approach to the dynamics and implications of regionalism Instead of limiting their focus to security matters they extend their discussions to topics as diverse as the mercurial nature of Japan s leadership role in the region Southeast Asian business networks the war on terrorism in Asia and the political economy of environmental regionalism Throughout they show how nation states corporations and problem specific coalitions have furthered regional cohesion not only by establishing formal institutions but also by operating informally semiformally or even secretly *Interregionalism and the Americas* Andreas Falke, Gian Luca Gardini, Simon Koschut, 2018-10-15 This book addresses the question of how the American continent engages with various forms of interregionalism including how different regions within the Americas deal with other regions of the world as well as how they relate among themselves The presence of different political economic and cultural sub regions within the Americas makes the continent a perfect setting to explore differences and commonalities in the western hemisphere s relationship with other regions across the globe Interregionalism and the Americas tackles three unifying questions First what type and understanding of interregionalism characterize the Americas way to interregionalism if any Second is summitry ultimately the major visible feature of interregionalism in the Americas and beyond Third is there anything typical or characteristic in the way in which the Americas engage with interregionalism This book contributes both to the theoretical debates about interregionalism and to the empirical understanding of the phenomenon and makes a compelling case to strengthen the inter American system and to advance a trilateral interregionalism mechanism between North America Latin America and Europe to stand up for their common values norms and preferred international order

Globalization Meshack M. Sagini, 2014-11-21 Globalization The Paradox of Organizational Behavior is an excellent resource for undergraduate and graduate students professors policy makers and the intelligentsia worldwide Sagini explores the text's major themes using historical materialistic and imperialistic factors The globalization movement is shaped by economic political technological and cultural forces that transform human collectivities Instability and related concomitant issues such as disease energy security and terrorism challenge the reconstructive role of internal and external factors in foreign policy decision making The implications of the global forces on the divided world of gated communities urban and village ghettos national borders and cultural decay could be far reaching if leaders fail to redesign and implement effective governance models

Russian Policy Towards China and Japan Natasha Kuhrt, 2007-12-24 Drawing on the most up-to-date sources, this book provides an in-depth examination of Russia's relations with China and Japan, the two Asia-Pacific superpowers in waiting. For Russia, there has always been more than one Asia. After the collapse of the Soviet Union, there were those in the Russian elite who saw Asia as implying the economic dynamism of the Asia-Pacific, with Japan as the main player. However, there were others who saw the chance for Russia to reassert its claim to be a great power based on Russia's geopolitical and geoeconomic position as a Eurasian power. For these, China was the power to engage with; together, China and Russia could control both Heartland and Rim, both Eurasia and Asia-Pacific. Whereas accepting Japan's conception of Asia implied regional fragmentation and shared sovereignty, this book argues that this strand of thinking, mainly confined to nationalists in the Eltsin years, has now under Putin become the dominant discourse among Russian policymakers. Despite opportunities for convergence presented by energy resources, even for trilateral cooperation, traditional anxiety regarding loss of control over key resource areas in the Russian Far East is now used to inform regional policy, leading to a new resource nationalism. In light of Russia's new assertiveness in global affairs and its increasing use of the so-called energy weapon in foreign policy, this book will appeal not only to specialists on Russian politics and foreign policy but also to international relations scholars.
