## Northern Transitions:

*Theorizing Native Studies* Audra Simpson, 2014-05-07 This important collection makes a compelling argument for the importance of theory in Native studies Within the field there has been understandable suspicion of theory stemming both from concerns about urgent political issues needing to take precedence over theoretical speculations and from hostility toward theory as an inherently Western imperialist epistemology The editors of *Theorizing Native Studies* take these concerns as the ground for recasting theoretical endeavors as attempts to identify the larger institutional and political structures that enable racism inequities and the displacement of indigenous peoples They emphasize the need for Native people to be recognized as legitimate theorists and for the theoretical work happening outside the academy in Native activist groups and communities to be acknowledged Many of the essays demonstrate how Native studies can productively engage with others seeking to dismantle and decolonize the settler state including scholars putting theory to use in critical ethnic studies gender and sexuality studies and postcolonial studies Taken together the essays demonstrate how theory can serve as a decolonizing practice Contributors Christopher Bracken Glen Coulthard Mishuana Goeman Dian Million Scott Morgensen Robert Nichols Vera Palmer Mark Rifkin Audra Simpson Andrea Smith Teresia Teaiwa Bethany Beach, 1998 **Politics and History in Band Societies** Richard Lee, 1982-09-30 The papers collected in this volume present important information on the history and culture of contemporary gathering and hunting peoples from Canada India Africa Australia and the Philippines The volume focuses on two themes first on the techniques which band living foraging peoples employ to organise their social and economic lives and second on their fight for the right to their own lands and for a measure of cultural and political autonomy The contributors maintain that gatherer hunters are not examples of a disappearing way of life but peoples who have maintained their social and economic practices through long periods of contact with stratified societies The aim of this volume is to make known to as wide an audience as possible the daily lives the patterns of relations between the sexes and the political orientations of the world's contemporary foragers *Aboriginal Peoples and Natural Resources in Canada* Claudia Notzke, 1994 The most current and comprehensive book of its kind *Aboriginal Peoples and Natural Resources in Canada* explores the opportunities and constraints that aboriginal people encounter in their efforts to use water resources fisheries forestry resources wildlife land and non renewable resources and to gain management power over these resources This examination begins with a historical perspective and takes into account cultural political legal and geographical factors From the contemporary research of the author the reader is informed of the most current developments and provided with a well reasoned outlook for the future This book is an essential resource for aboriginal people engaged in the use and management of natural resources and for those who seek professional training in the field Anyone wanting to know more about the social and environmental issues pertaining to more responsible and equitable environmental and ecological management will find a wealth of information in this volume BOOK JACKET Title Summary field provided by Blackwell North
