Wines & Vines H. F. Stoll,2011 *From Biological Control to Invasion: the Ladybird Harmonia axyridis as a Model*

Species Helen E. Roy, Eric Wajnberg, 2008-01-26 *Harmonia axyridis* has been described as the most invasive ladybird on Earth. It has a long history of use as a classical biological control agent in the USA and more recently in Europe. This beetle has been effective at controlling pest insects in a variety of crop systems but it poses unacceptable risks by impacting on non-target species as both an intraguild predator and competitor. Written by renowned scientists, this book is a synthesis of recent research on *H. axyridis* and provides informative insights into current perspectives and future directions. Biological control is an essential component of sustainable agriculture but the distinction between a successful biological control agent and an invasive species can be narrow. We hope that lessons can be learnt from *H. axyridis*. *Winter Injury to Grapevines and Methods of Protection*, 2007 *Michigan Geography and Geology* Randall J.
