Surrealism in North Africa and Western Asia Monique Bellan, Julia Drost, 2021-11-23 Der vorliegende Band beschäftigt sich mit dem Surrealismus in Literatur und Kunst in Algerien, Ägypten, Libanon, Syrien und der Türkei zwischen den 1930er und 1980er Jahren In einer transkulturellen Perspektive erscheint die zu Beginn der 1920er Jahre von Frankreich ausgehende Bewegung gleichermaßen als globales wie als lokales Phänomen das in den hier behandelten Regionen weniger auf kollektive als auf individualistische Weise vornehmlich auf dem Gebiet von Poesie und Sprache rezipiert wurde Die Studien in diesem Band verfolgen das Ziel ein klareres Bild von den Resonanzen des Surrealismus in diesen Regionen zu zeichnen und damit einen Beitrag zur Geschichte sowohl der Transmoderne als auch des Surrealismus zu leisten Methodisch geht es darum Verbindungen, Begegnungen und Austausch auf individuell, künstlerischer, politisch, institutioneller und soziohistorischer Ebene zu untersuchen Ein neuer Blick auf den globalen Surrealismus muss diese Netzwerke und Verbindungen auf der Mikroebene berücksichtigen wenn es um die Fragen geht wann, wo und was Surrealismus war Die Antwort könnte zeigen dass der Surrealismus weitaus weiter verbreitet war als bisher angenommen

The Languages and Linguistics of Western Asia Geoffrey Haig, Geoffrey Khan, 2018-12-03 The languages of Western Asia belong to a variety of language families including Indo-European, Kartvelian, Semitic and Turkic but share numerous features on account of being in areal contact over many centuries This volume presents descriptions of the modern languages contributed by leading specialists and evaluates similarities across the languages that

may have arisen by areal contact. It begins with an introductory chapter presenting an overview of the various genetic groupings in the region and summarizing some of the significant features and issues relating to language contact. In the core of the volume the presentation of the languages is divided into five contact areas which include i eastern Anatolia and northwestern Iran ii northern Iraq iii western Iran iv the Caspian region and south Azerbaijan and v the Caucasian rim and southern Black Sea coast. Each section contains chapters devoted to the languages of the area preceded by an introductory section that highlights significant contact phenomena. The volume is rounded off by an appendix with basic lexical items across a selection of the languages. The handbook features contributions by Erik Anonby, Denise Bailey, Christiane Bulut, David Erschler, Geoffrey Haig, Geoffrey Khan, Rene Lacroix, Parvin Mahmoudveysi, Hrach Martirosyan, Ludwig Paul, Stephan Prochzka, Laurentia Schreiber, Don Stilo, Mortaza Taheri, Ardali Christina van der Wal, Anonby.

The Routledge Handbook of the Peoples and Places of Ancient Western Asia Trevor Bryce, 2009. This 500 000 word reference work provides the most comprehensive general treatment available of the peoples and places of the regions commonly referred to as the ancient Near and Middle East, extending from the Aegean coast of Turkey in the west to the Indus river in the east. It contains some 1 500 entries on the kingdoms, countries, cities and population groups of Anatolia, Cyprus, Syria, Palestine, Mesopotamia and Iran and parts of Central Asia from the Early Bronze Age to the end of the Persian empire. Five distinguished international scholars have collaborated with the author on the project. Detailed accounts are provided of the Near Middle Eastern peoples and places known to us from historical records. Each of these entries includes specific references to translated passages from the relevant ancient texts. Numerous entries on archaeological sites contain accounts of their history of excavation as well as more detailed descriptions of their chief features and their significance within the commercial, cultural and political contexts of the regions to which they belonged. The book contains a range of illustrations including twenty maps. It serves as a major, indeed a unique, reference source for students as well as established scholars both of the ancient Near East as well as the Classical civilizations. It also appeals to more general readers wishing to pursue in depth their interests in these civilizations. There is nothing comparable to it on the market today.

Bronze-Working Centres Of Western Asia Curtis, 2021-09-01. First published in 1988, the present volume contains the texts of papers read at a three day Colloquium on bronzeworking centres in Western Asia from 1000 BC until the beginning of the Achaemenian period in 539 BC, which was held in the British Museum in July 1986. Each paper has been revised in the light of the discussion which followed it. The Colloquium was organized by Dr J E Curtis on behalf of the Department of Western Asiatic Antiquities and forms the first in a series which it is hoped will be held annually.

Antiochos III and the Cities of Western Asia Minor John Ma, 2000-03-10. This work examines a test case for the relationship between the polis and the Hellenistic empire, focusing specifically on the interaction between Antiochos III and the cities of Western Asia Minor, 226-188 BC. Such a study is possible thanks to a rich epigraphical documentation which has been reproduced extensively and translated in an appendix to this book. Dr Ma approaches this

material from a variety of angles narrative history structural analyses of imperial power and analyses of the functions played by language and stereotype in the interaction between rulers and ruled The result is to further a nuanced appreciation of the relation between the Hellenistic king and the Hellenistic polis by drawing attention to the power of the Hellenistic empires to the capacity of political language to modify power relations and to the efforts of the Hellenistic polis to preserve its sense of identity and civic pride if not its political independence

Ancient Western Asia Beyond the Paradigm of Collapse and Regeneration (1200-900 BCE) Maria Grazia Masetti-Rouault, Ilaria Calini, Robert Hawley, Lorenzo d'Alfonso, 2024-05-07 New results and interpretations challenging the notion of a uniform macroregional collapse throughout the Late Bronze Age Eastern Mediterranean Ancient Western Asia Beyond the Paradigm of Collapse and Regeneration 1200 900 BCE presents select essays originating in a two year research collaboration between New York University and Paris Sciences et Lettres The contributions here offer new results and interpretations of the processes and outcomes of the transition from the Late Bronze Age to the Iron Age in three broad regions Anatolia northern Mesopotamia and the Levant Together these challenge the notion of a uniform macroregional collapse throughout the Eastern Mediterranean followed by the regeneration of political powers Current research on newly discovered or reinterpreted textual and material evidence from Western Asia instead suggests that this transition was characterized by a diversity of local responses emerging from diverse environmental settings and culture complexes as evident in the case studies collected here in history archaeology and art history The editors avoid particularism by adopting a regional organization with the aim of identifying and tracing similar processes and outcomes emerging locally across the three regions Ultimately this volume reimagines the Late Bronze Iron Age transition as the emergence of a set of recursive processes and outcomes nested firmly in the local cultural interactions of western Asia before the beginning of the new unifying era of Assyrian imperialism

The Africa and West Asia Agricultural Situation, 1966 [The Agricultural Situation in Africa and West Asia](#) United States. Department of Agriculture. Economic Research Service, 1966 [The Emergence of Pottery in West Asia](#) Akiri Tsuneki, Olivier Nieuwenhuyse, Stuart Campbell, 2017-03-31 Over the past fifty years or so early pottery complexes in the wider region of West Asia have hardly ever been investigated in their own right Early ceramics have often been unexpected by products of projects focussing upon much earlier aceramic or later prehistoric periods In recent years however there has been a tremendous increase in research in various parts of West Asia focusing explicitly on this theme It had generally become accepted that the adoption of pottery in West Asia happened relatively late in the history of ceramics Several regions are now believed to have developed pottery significantly earlier Thus pottery occurs in Eastern Russia in China and Japan by 16 500 cal BC and in north Africa it is known in the 10th millennium However while the East Asian examples in particular do mark chronologically earlier instances the picture in West Asia is actually rather more complex in part because of the tyranny

of the Aceramic Ceramic Neolithic chronology For the first time The Emergence of Pottery in West Asia examines in detail the when where how and why pottery first arrived in the region A key insight that emerges is that we must not confuse the reasons for pottery adoption with the long term consequences Neolithic peoples in West Asia did not adopt pottery because of the many uses and functions it would gain many centuries later and the development of ceramic technology needs to be examined in the context of its original cultural and social milieu **The Forest Flora of North-West and Central India**
