Bennett, 2017-07-14 A study of a rural region and plural society this book is a distinctive contribution to anthropology in that it brings the conceptual framework of that discipline to bear on a contemporary agrarian society and its historical development rather than on peasant or tribal peoples cultural ecology in that it shows the nature of the adaptations of four distinctive social groups to the environment of the Canadian Great Plains the study of social and economic change as it describes cultural patterns and mechanisms that are relevant to agrarian development the world over and North American studies in as much as it deals with community life in the classic sequence of settlement of the Western Plains The book is focused throughout on the adaptation of human societies to their environment Four groups are described the Cree Indians the aboriginal inhabitants of the area who have lost all organic relationship to natural resources and who have devised ingenious methods for manipulating the social environment ranchers whose specialized production is based upon resources used in their natural state homestead farmers whose maladjusted small farm economy after initial setbacks achieved a degree of stability through interventions by government in their adaptations to nature and the market economy and the Hutterian Brethren whose adaptation consisted primarily of the introduction to the region of a new kind of social organization This book combines the anthropological concept of culture and the framework of ecology in the study of a modern social milieu it focuses on a region rather than on a single culture people or community so that the interplay of several social groups can be appreciated and it elaborates contemporary anthropological and ecological theory in a manner that makes it applicable to the understanding of contemporary agrarian societies John W Bennett was emeritus professor of anthropology at Washington University St Louis He served as president of the American Ethnological Society and the Society for Applied Anthropology and was a member of the editorial boards of the Annual Review of Anthropology and Reviews in Anthropology Among his books are The Ecological Transition Cultural Anthropology and Human Adaptation 1976 2005 Classic Anthropology Critical Essays 1944 1996 1997 and Human Ecology as Human Behavior Essays in Environmental and Development Anthropology 1995      *Northern Plainsmen* John William Bennett, 1969      Hutterite Society John A. **Finding The Middle Path** B. S. Baviskar, 2019-03-13 Soviet style socialism has failed but in Russia China and India the transition to capitalism has proven hazardous Elsewhere capitalism itself appears to be in crisis often failing to meet the fundamental needs of workers small farmers and even the middle classes Clearly the world needs enterprises that are both economically efficient and      A Companion to Cultural Geography James Duncan, Nuala C. Johnson, Richard H. Schein, 2008-04-15 A Companion to Cultural Geography brings together original contributions from 35 distinguished international scholars to provide a critical overview of this dynamic and influential field of study Provides accessible

overviews of key themes debates and controversies from a variety of historical and theoretical vantage points Charts significant changes in cultural geography in the twentieth century as well as the principal approaches that currently animate work in the field A valuable resource not just for geographers but also those working in allied fields who wish to get a clear understanding of the contribution geography is making to cross disciplinary debates

**Arctic Adaptations** Igor Krupnik, 2002-06-01 The common view of indigenous Arctic cultures even among scholarly observers has long been one of communities continually in ecological harmony with their natural environment In Arctic Adaptations Igor Krupnik dismisses the textbook notion of traditional societies as static Using information from years of field research interviews with native Siberians and archaeological site visits Krupnik demonstrates that these societies are characterized not by stability but by dynamism and significant evolutionary breaks Their apparent state of ecological harmony is in fact a conscious survival strategy resulting from a prolonged and therefore successful process of human adaptation in one of the most extreme inhabited environments in the world As their physical and cultural environment has changed fluctuating reindeer and caribou herds unpredictable weather patterns introduction of firearms and better seacraft Arctic communities have adapted by developing distinctive subsistence practices social structures and ethics regarding utilization of natural resources Krupnik's pioneering work represents a dynamic marriage of ethnography and ecology and makes accessible to Western scholars crucial findings and archival data previously unavailable because of political and language barriers

**What to Think about Cooperatives** Judith Tendler, 1983

**Environment and Culture** Irwin Altman, Joachim F. Wohlwill, 2013-06-29 Following upon the first two volumes in this series which dealt with a broad spectrum of topics in the environment and behavior field ranging from theoretical to applied and including disciplinary interdisciplinary and professionally oriented approaches we have chosen to devote subsequent volumes to more specifically defined topics Thus Volume Three dealt with Children and the Environment seen from the combined perspective of researchers in environmental and developmental psychology The present volume has a similarly topical coverage dealing with the complex set of relationships between culture and the physical environment It is broad and necessarily eclectic with respect to content theory methodology and epistemological stance and the contributors to it represent a wide variety of fields and disciplines including psychology geography anthropology economics and environmental design We were fortunate to enlist the

collaboration of Amos Rapoport in the organization and editing of this volume as he brings to this task a particularly pertinent perspective that combines anthropology and architecture Volume Five of the series presently in preparation will cover the subject of behavioral science aspects of transportation Irwin Altman Joachim F Wohlwill ix Contents Introduction 1

CHAPTER 1 CROSS CULTURAL ASPECTS OF ENVIRONMENTAL DESIGN AMOS RAPOPORT Introduction 7 Culture 9 Environmental Design 10 The Relationship of Culture and Environmental Design 15 The Variability of Culture Environment Relations 19 Culture Specific Environments 26 Designing for Culture 30 Implications for the Future 39 References 42

CHAPTER 2 CROSS CULTURAL RESEARCH METHODS STRATEGIES PROBLEMS APPLICATIONS RICHARD W **The Ecological Transition** John W. Bennett, 2017-09-29 Written during the height of the ecology movement The Ecological Transition is a stunning interdisciplinary work It combines anthropology ecology and sociology to formulate an understanding of cultural environmental relationships While anthropologists have been studying relationships between humans and the physical environment for a very long time only in the last thirty years have questions inherent in these relationships broadened beyond description and classification For example the concept of environment has been extended beyond the physical into the social Although anthropologists have adopted many of the concepts that Bennett develops in the book he also feels that the central issues have never been addressed either by anthropologists or by people in related disciplines The most important of these in Bennett's opinion is the failure to incorporate a respect for the environmental in contemporary culture which would allow making exceptions in certain human practices in order to protect the environment His point in The Ecological Transition is that a basic cultural change in modern civilization is necessary to achieve this end Both a theoretical and a practical work The Ecological Transition emphasizes the relationships between human culture the physical environment technology and social policy The Ecological Transition is a challenging volume that makes us face the consequences of human behavior in the modern world its effect on pollution natural resources agriculture the economy and population to name just a few areas The book remains a significant contribution to the discourse on social economic and environmental problems While the book was first published in 1976 it still reads as a contemporary tract Himalayan Households Thomas Earl Fricke, 1994 Available for the first time in English this is the definitive account of the practice of sexual slavery the Japanese military perpetrated during World War II by the researcher principally responsible for exposing the Japanese government's responsibility for these atrocities The large scale imprisonment and rape of thousands of women who were euphemistically called comfort women by the Japanese military first seized public attention in 1991 when three Korean women filed suit in a Tokyo District Court stating that they had been forced into sexual servitude and demanding compensation Since then the comfort stations and their significance have been the subject of ongoing debate and intense activism in Japan much if it inspired by Yoshimi's investigations How large a role did the military and by extension the government play in setting up and administering these camps What type of compensation if any are the victimized women

due These issues figure prominently in the current Japanese focus on public memory and arguments about the teaching and writing of history and are central to efforts to transform Japanese ways of remembering the war Yoshimi Yoshiaki provides a wealth of documentation and testimony to prove the existence of some 2 000 centers where as many as 200 000 Korean Filipina Taiwanese Indonesian Burmese Dutch Australian and some Japanese women were restrained for months and forced to engage in sexual activity with Japanese military personnel Many of the women were teenagers some as young as fourteen To date the Japanese government has neither admitted responsibility for creating the comfort station system nor given compensation directly to former comfort women This English edition updates the Japanese edition originally published in 1995 and includes introductions by both the author and the translator placing the story in context for American readers

Mountain, Field, and Family Stephen B. Brush, 2016-11-11 This book is a volume in the Penn Press Anniversary Collection To mark its 125th anniversary in 2015 the University of Pennsylvania Press rereleased more than 1 100 titles from Penn Press s distinguished backlist from 1899 1999 that had fallen out of print Spanning an entire century the Anniversary Collection offers peer reviewed scholarship in a wide range of subject areas Family Farming In Europe And America

Boguslaw Galeski, 2020-09-23 Much has happened since agricultural economists and rural sociologists met at the University of Chicago in 1946 to discuss family farming The problems and issues related to the structure of agriculture have been intensified by current economic considerations which promote the growth of larger scale commercial farming operations and edge out many smaller farms owned operated and worked by families In this book contributors from eleven nations in Europe and North America provide a comparison of farm structure under different economic and political systems including Poland as an example of a non market economy In addition to providing information on how local state and international policies have affected the agricultural enterprise they look at the role of farmers organizations in policy formulation and take note of changes in farm patterns and policies that have had an impact on farm production off farm work and the welfare of farm families and rural communities

**Settlement Ecology** Glenn Davis Stone, 2022-11-08 What determines agrarian settlement patterns Glenn Davis Stone addresses this question by analyzing the spatial aspects of agrarian ecology the relationship between how farmers farm and where they settle and how farming and settlement change as population density rises Crosscutting the fields of cultural anthropology archaeology geography and agricultural economics Settlement Ecology presents a new perspective on the process of agricultural intensification and explores the relationships between intensification and settlement decision making Stone insists that paleotechnic traditional agriculture must be seen as a social process with the social organization of agricultural work playing a key role in shaping settlement characteristics These relationships are demonstrated in a richly documented case study of the Kofyar who have been settling a frontier in the Nigerian savanna The history of agricultural change and the development of the settlement pattern are reconstructed through ethnography archival research and aerial photos and are analyzed using innovative graphical methods Stone also

reflects on the limits of ecological determination of settlement comparing the farming and settlement trajectories of the Kofyar and Tiv on the same frontier

**Routledge Handbook of Environmental Anthropology** Helen Kopnina, Eleanor Shoreman-Ouimet, 2016-08-12 Environmental Anthropology studies historic and present human environment interactions This volume illustrates the ways in which today's environmental anthropologists are constructing new paradigms for understanding the multiplicity of players pressures and ecologies in every environment and the value of cultural knowledge of landscapes This Handbook provides a comprehensive survey of contemporary topics in environmental anthropology and thorough discussions on the current state and prospective future of the field in seven key sections As the contributions to this Handbook demonstrate the subfield of environmental anthropology is responding to cultural adaptations and responses to environmental changes in multiple and complex ways As a discipline concerned primarily with human environment interaction environmental anthropologists recognize that we are now working within a pressure cooker of rapid environmental damage that is forcing behavioural and often cultural changes around the world As we see in the breadth of topics presented in this volume these environmental challenges have inspired renewed foci on traditional topics such as food procurement ethnobiology and spiritual ecology and a broad new range of subjects such as resilience nonhuman rights architectural anthropology industrialism and education This volume enables scholars and students quick access to both established and trending environmental anthropological explorations into theory methodology and practice

Political Ecology Paul Robbins, 2019-10-08 An accessible focused exploration of the field of political ecology The third edition of Political Ecology spans this sprawling field using grounded examples and careful readings of current literature While the study of political ecology is sometimes difficult to fathom owing to its breadth and diversity this resource simplifies the discussion by reducing the field down into a few core questions and arguments These points clearly demonstrate how critical theory can make pragmatic contributions to the fields of conservation development and environmental management The latest edition of this seminal work is also more closely focused with references to recent work from around the world Further Political Ecology raises critical questions about traditional approaches to environmental questions and problems This new edition Includes international work in the field coming out of Europe Latin America and Asia Explains political ecology and its tendency to disrupt the environmental research and practice by both advancing and undermining associated fields of study Contains contributions from a wide range of diverse backgrounds and expertise Offers a resource that is written in highly accessible straightforward language Outlines the frontiers of the field and frames climate change and the end of population growth with the framework of political ecology An excellent resource for undergraduates and academics the third edition of Political Ecology offers an updated edition of the guide to this diverse quickly growing field that is at the heart of how humans shape the world and in turn are shaped by it

Human Ecology as Human Behavior John W. Bennett, 2017-07-05 Human interaction with the natural environment has a dual character By turning increasing quantities of natural substances

into physical resources human beings might be said to have freed themselves from the constraints of low technology survival pressures. However, the process has generated a new dependence on nature in the form of complex socionatural systems as Bennett calls them in which human society and behavior are so interlocked with the management of the environment that small changes in the systems can lead to disaster. Bennett's essays cover a wide range from the philosophy of environmentalism to the ecology of economic development from the human impact on semi arid lands to the ecology of Japanese forest management. This expanded paperback edition includes a new chapter on the role of anthropology in economic development. Bennett's essays exhibit an underlying pessimism if human behavior toward the physical environment is the distinctive cause of environmental abuse then reform of current management practices offers only temporary relief that is conservationism like democracy must be continually reaffirmed. Clearly presented and free of jargon *Human Ecology* as *Human Behavior* will be of interest to anthropologists economists and environmentalists.

## Enjoying the Song of Appearance: An Psychological Symphony within **Northern Plainsmen Adaptive Strategy And Agrarian Life**

In some sort of eaten by screens and the ceaseless chatter of instant interaction, the melodic elegance and psychological symphony developed by the published term frequently fade into the background, eclipsed by the persistent noise and distractions that permeate our lives.
