Fighters and Bombers of World War II , *American Warplanes of WWII* , *American Aircraft Development Second World War Legacy* William J. Norton, 2021-12-02 This volume focuses on the influence of America's Second World War aviation development and experience subsequent aviation

technological advances and world events in shaping American choices in military aircraft and associated weapons development during the few years following the war. It shows how air warfare weapons from the last conflict were carried forward and altered how new systems evolved from these and how the choices fared in the next war, Korea. The period was one of remarkable progress in a short span of time via a great many aircraft and weapons programs and associated technological progress. These systems were of immense importance, influencing and growing the engineering, production, and operational capabilities to be exploited for the next generation of weapons that soon followed. Emphasized is the innovative features or new technology and how these contributed to advancing American military aviation, influencing the evolution of follow-on models or types. Included are military prototype, experimental, and research aircraft that are equally important in understanding the history of American aircraft development. Combat employment progress and equipment adaptation during the Korean Conflict is then highlighted. Tabulated characteristics are provided of those aircraft that entered production or represented significant technological advances influencing others that follow.

Warbirds John C. Fredriksen, 1999-11-02

Warbirds pays special attention to the aircraft of America's Golden Age, 1919-1939, and the breakthrough technological developments of that era. Warbirds offers more than 300 A-Z entries of the aircraft of America's Golden Age. Each entry includes a photograph of the warplane, service dates, manufacturer records, set engineering and performance history, technical innovations, and even operational problems. To help enthusiasts and researchers, the guide cites the very latest books and periodical literature in its two extensive bibliographies. It also lists aviation museums, airplane magazines, and sources of photographs.

Deny Them the Night Sky Eric Shulenberger, 2005

The 280 men of the 548th Night Fighter Squadron fought their P-61 Black Widows across the Pacific. The Ground Echelon landed on Iwo on D+8 under the mortar, small arms, and kamikaze attack. The Widows arrived a little later. The entire Squadron lived in foxholes between USMC howitzers and the enemy for 6 weeks on C rations and one canteen of water per day. All while maintaining and flying the world's most complex aircraft. Not a single Japanese bomb fell on Iwo while the 548th stood night time watch. On Ie Shima, Okinawa, they again arrived under kamikaze attack, shot down several enemy aircraft, made extensive night intruder bombing and rocket attacks, acted as escorts for hundreds of B-29 crew rescues, and made critical nightly weather observations over tomorrow's targets for the day bomber fleet. The Squadron had its share of odd moments, from losing a man on Iwo to its own friendly small arms fire to scoring the only American shoot-downs of a B-29 and a P-61. This book is those men's story, all of them, not just the aircrews. It covers the entire history of the Squadron. The tale is told as much as possible in the first person, using Squadron veterans' memories, illustrations, and extensive records and memorabilia augmented where records exist by official materials.
