## **Not In Our Backyards Community Action For Health And The Environment:**

Routledge Library Editions: Environmental Policy Various, 2021-06-23 The 11 volumes in this set originally published between 1982 and 1995 draw together research by leading academics in the area of environmental policy and provides a rigorous examination of related key issues The volumes examine international policy impact assessment and future environmental planning This set will be of particular interest to students of Environmental Studies     **Environmental Sociology** Michael D. Mehta, Eric Ouellet, 1995     *Environmental Injustices, Political Struggles* David Enrique Cuesta Camacho, 1998 In the United States few issues are more socially divisive than the location of hazardous waste facilities and other environmentally harmful enterprises Do the negative impacts of such polluters fall disproportionately on African Americans Hispanics Native Americans and Asian Americans *Environmental Injustices Political Struggles* discusses how political economic social and cultural factors contribute to local government officials consistent location of hazardous and toxic waste facilities in low income neighborhoods and how as a result low income groups suffer disproportionately from the regressive impacts of environmental policy David E Camacho's collection of essays examines the value laden choices behind the public policy that determines placement of commercial environmental hazards points to the underrepresentation of people of color in the policymaking process and discusses the lack of public advocates representing low income neighborhoods and communities This book combines empirical evidence and case studies from the failure to provide basic services to the colonias in El Paso County Texas to the race for water in Nevada and covers in great detail the environmental dangers posed to minority communities including the largely unexamined communities of Native Americans The contributors call for cooperation between national environmental interest groups and local grassroots activism more effective incentives and disincentives for polluters and the adoption by policymakers of an alternative rather than privileged perspective that is more sensitive to the causes and consequences of environmental inequities *Environmental Injustices Political Struggles* is a unique collection for those interested in the environment public policy and civil rights as well as for students and scholars of political science race and ethnicity and urban and regional planning Contributors C Richard Bath Kate A Berry John G Bretting David E Camacho Jeanne Nienaber Clarke Andrea K Gerlak Peter I Longo Diane Michele Prindeville Linda Robyn Stephen Sandweiss Janet M Tanski Mary M Timney Roberto E Villarreal Harvey L White     **Toxic Town** Peter C. Little, 2014-03-14 Shows the risks of high tech pollution through a study of an IBM plant's effects on a New York town In 1924 IBM built its first plant in Endicott New York Now Endicott is a contested toxic waste site With its landscape thoroughly contaminated by carcinogens Endicott is the subject of one of the nation's largest corporate state mitigation efforts Yet despite the efforts of IBM and the U S government Endicott residents remain skeptical that the mitigation systems employed were designed with their best interests at heart In *Toxic Town* Peter C Little tracks and critically diagnoses the experiences of Endicott residents as they learn to live with high tech pollution community transformation scientific expertise corporate

state power and risk mitigation technologies By weaving together the insights of anthropology political ecology disaster studies and science and technology studies the book explores questions of theoretical and practical import for understanding the politics of risk and the ironies of technological disaster response in a time when IBM's stated mission is to build a Smarter Planet Little critically reflects on IBM's new corporate tagline arguing for a political ecology of corporate social and environmental responsibility and accountability that places the social and environmental politics of risk mitigation front and center Ultimately Little argues that we will need much more than hollow corporate taglines claims of corporate responsibility and attempts to mitigate high tech disasters to truly build a smarter planet

**Earth Follies** Joni Seager, 2019-03-21 First published in 1993 The question of agency is essential to our understanding of environmental problems who is responsible and why Threats such as ozone depletion global warming and overconsumption are all precipitated by the powerful institutions which shape modern life institutions which are overwhelmingly controlled by men and dominated by masculine presumptions Joni Seager argues that the gender bias inherent in western culture is inextricably linked to our environmental crisis She analyses the traditional institutes of power governments the military and transnational corporations and also takes a critical look at the equally patriarchal environmental establishment comparing the work of the official environmental movement grounded in masculine thought with the smaller scale direct actions taken by women driven to protect their homes and communities Earth Follies represents an incisive and utterly convincing feminist critique of our environmental crises and offers radical and productive priorities for the environmental agenda

**Where We Live, Work and Play** Patrick Novotny, 2000-08-30 Numerous studies have revealed that the poor disproportionately bear the burden of environmental problems in America today Issues range from higher levels of poisonous wastes carbon dioxide and ozone to greater than normal incidences of asthma and lead poisoning The environmental justice movement which has emerged in working class and low income African American and Latino communities since the early 1990s is an effort that is reinterpreting the definition of the environment as where we live work and play to connect new constituencies traditionally outside of the postwar environmental movement Novotny documents this expanding constituency through case studies of four community groups ranging from South Central Los Angeles to Louisiana Environmental racism is understood as yet another type of discrimination which results in a high incidence of environmental concerns in poorer communities due to what many activists see as discriminatory land use practices decisions by industry that intentionally locate hazardous wastes in these communities and the uneven enforcement of environmental regulations by federal state and local officials Community leaders have added environmental causes to their fight against unemployment impoverishment and substandard housing This study explores various attempts to put a halt to illegal practices and to broaden public awareness of the issues involved

Crazy for Democracy Temma Kaplan, 2016-01-08 Crazy for Democracy vividly shows through the lives of six women in the United States and South Africa just what can be and is being accomplished to change our lives At a time when we're depressed

about democracy pessimistic about race relations and anxious about feminism Crazy for Democracy vividly shows through the lives of six women in the United States and South Africa just what can be and is being accomplished to change our lives In building real social movements to achieve a safe environment win human rights and safeguard their homes these grassroots feminist leaders have been creating democratic institutions to achieve social justice for us all New Risks: Issues and Management Louis A. Cox, Paolo F. Ricci, 2013-06-29 This volume contains the proceedings of the 1986 annual meeting and conference of the Society for Risk Analysis It provides a detailed view of both mature disciplines and emerging areas within the fields of health safety and environmental risk analysis as they existed in 1986 In selecting and organizing topics for this conference we sought both i to identify and include new ideas and application areas that would be of lasting interest to risk analysts and to users of risk analysis results and ii to include innovative methods and applications in established areas of risk analysis In the three years since the conference many of the topics presented there for the first time to a broad risk analysis audience have become well developed and sometimes hotly debated areas of applied risk research Several such as the public health hazards from indoor air pollutants radon in the home high voltage electric fields and the AIDS epidemic have been the subjects of headlines since 1986 Older areas such as hazardous waste site ranking and remediation air emissions dispersion modeling and exposure assessment transportation safety seismic and nuclear risk assessment and occupational safety in the chemical industry have continued to receive new treatments and to benefit from advances in quantitative risk assessment methods as documented in the theoretical and methodological papers in this volume A theme of the meeting was the importance of new technologies and the new and uncertain risks that they create **No Safe Place** Phil Brown, Edwin J. Mikkelsen, 1997-10-10 Toxic waste contaminated water cancer clusters these phrases suggest deception and irresponsibility But more significantly they are watchwords for a growing struggle between communities corporations and government In No Safe Place sociologists public policy professionals and activists will learn how residents of Woburn Massachusetts discovered a childhood leukemia cluster and eventually sued two corporate giants Their story gives rise to questions important to any concerned citizen What kind of government regulatory action can control pollution Just how effective can the recent upsurge of popular participation in science and technology be Phil Brown a medical sociologist and Edwin Mikkelsen psychiatric consultant to the plaintiffs look at the Woburn experience in light of similar cases such as Love Canal in order to show that toxic waste contamination reveals fundamental flaws in the corporate governmental and scientific spheres The authors strike a humane constructive note amidst chilling odds advocating extensive lay involvement based on the Woburn model of civic action Finally they propose a safe policy for toxic wastes and governmental corporate responsibility Woburn the authors predict will become a code word for environmental struggles

**Handbook of Risk and Crisis Communication** Robert L. Heath, H. Dan O'Hair, 2020-10-28 The Handbook of Risk and Crisis Communication explores the scope and purpose of risk and its counterpart crisis to facilitate the understanding of

these issues from conceptual and strategic perspectives Recognizing that risk is a central feature of our daily lives found in relationships organizations governments the environment and a wide variety of interactions contributors to this volume explore such questions as What is likely to happen to whom and with what consequences To what extent can science and vigilance prevent or mitigate negative outcomes and What obligation do some segments of local national and global populations have to help other segments manage risks shedding light on the issues in the quest for definitive answers The Handbook offers a broad approach to the study of risk and crisis as joint concerns Chapters explore the reach of crisis and risk communication define and examine key constructs and parse the contexts of these vital areas As a whole the volume presents a comprehensive array of studies that highlight the standard principles and theories on both topics serving as the largest effort to date focused on engaging risk communication discussions in a comprehensive manner Now available in paperback the Handbook of Risk and Crisis Communication can be readily used in graduate coursework and individual research programs With perspectives from psychology sociology anthropology political science economics and communication the Handbook provides vital insights for all disciplines studying risk and is required reading for scholars and researchers investigating risk and crisis in various contexts

**EcoPopulism** Andrew Szasz, Moment by moment the evidence mounts that unchecked modern industry is bringing us ever closer to environmental disaster How can we move away from the brink of extinction toward a human society the earth can bear In the thriving popular politics of hazardous waste Andrew Szasz finds an answer a scenario for taking the most pressing environmental issues out of the academy and the boardroom and turning them into everyone's business This book reconstructs the growth of a powerful movement around the question of toxic waste Szasz follows the issue as it moves from the world of official policymaking in Washington onto the nation's television screens and into popular consciousness and then into America's neighborhoods spurring the formation of thousands of local community based groups He shows how in less than a decade a rich infrastructure of more permanent social organizations emerged from this movement expanding its focus to include issues like municipal waste military toxics and pesticides In the growth of this movement we witness the birth of a radical environmental populism Here Szasz identifies the force that pushed environmental policy away from the traditional approach pollution removal toward the superior logic of pollution prevention He discusses the conflicting official responses to the movement's evolution revealing that despite initial resistance lawmakers eventually sought to appease popular discontent by strengthening toxic waste laws In its success Szasz suggests this movement may even prove to be the vehicle for reinvigorating progressive politics in the United States
