White Vanishing Elspeth Tilley,2012-01-01 The story of the vulnerable white person vanishing without trace into the harsh Australian landscape is a potent and compelling element in multiple genres of mainstream Australian culture It has been sung in Little Boy Lost brought to life on the big screen in Picnic at Hanging Rock immortalized in Henry Lawson s poems of lost tramps and preserved in the history books tales of Leichhardt or Burke and Wills wandering in mad circles A world wide audience has also witnessed the many layered and oddly strident nature of Australian disappearance symbolism in media coverage of contemporary disappearances such as those of Azaria Chamberlain and Peter Falconio White Vanishing offers a revealing and challenging re examination of Australian disappearance mythology exposing the political utility at its core Drawing on wide ranging examples of the white vanishing myth the book provides evidence that disappearance mythology encapsulates some of the most dominant and durable categories at the heart of white Australian culture and that many of those ideas have their origin in colonial mechanisms of inequality and oppression White Vanishing deliberately and perhaps controversially reminds readers that while power is never absolute or irresistible some narrative threads carry a particularly authoritative inheritance of ideas and power relations through time

Time and Transcendence G. Motzkin,2012-12-06 This book investigates one aspect of the story of how our religiously oriented culture became a secular one It concentrates on the conflicts enveloping the attitude to the past from the late seventeenth to the early twentieth century The background argument is that the way the process of secularization occurred in one particular religious context the Roman Catholic one was determinative for the possibility of something such as secular culture and hence for both the modern secular attitude to the past and the modern religious one In recent years a spate of scholarship has suggested that the expanded version of Weber s theory according to which modernity is a consequence of Protestantism is not quite accurate Robert Merton modified this theory to argue that modern natural science originated in the context of seventeenth century Protestant England Against this position many scholars have investigated origins for the development of science in Catholic countries The development of natural science however is not the whole story of the development of modern secular culture even if the story of that development is restricted to the development of knowledge Our modern universities are organized around the division between humanities and natural sciences and it can be thought that this process of modernization or secularization affected the humanities no less than the sciences
