International Competitiveness of the Canadian Construction Industry Kirankumar Somchand Momaya, 1996 *Trade, Industrial Policy, and International Competition, Second Edition* Richard G. Harris, 2015-10-01 Richard Harris s now classic study on trade and industrial policy was written for the Royal Commission on the Economic Union and Development Prospects for Canada also known as the Macdonald Commission First published in 1985 when the Canadian economy faced dramatic changes arising from the emergence of manufacturing competitors among newly industrialized nations and increased protectionism in the US its recommendations were instrumental in the negotiation of the North America Free Trade Agreement Addressing the key issues surrounding the design and choice of policies for the Canadian economy Trade Industrial Policy and International Competition reviews the theory and evidence concerning trade liberalization as a mechanism to enhance economic growth disinvestment in sections that are disadvantageous in the international marketplace and future problems for the marketing sector caused by increasing competition from developing countries Drawing from many streams of conventional economic thinking Harris develops an original and sophisticated model for assessing the broader economic impacts of trade liberalization on the Canadian economy He concludes that free trade and industrial policy should be regarded as complementary not substitutes for one another and recommends a free trade agreement with the United States as a top priority A new introduction by David Wolfe situates this work within its time and shows how Harris s analytical insights and policy prescriptions are as relevant today as they when they were originally crafted three decades ago

Canadian Manufactured Exports Donald James Daly, Donald Clare MacCharles, 1986 This study provides important empirical background to the continuing debate on Canadian industrial policy and trade The analysis is based on primary data derived from a unique survey of individual firms both Canadian and foreign owned conducted early in the 1981 1982

recession The main purpose of the study is to assess whether recent changes in tariffs exchange rates wage rates and other factors in Canada and the world economy suggest the need for any significant modification in the earlier analyses and conclusions The study presents prior evidence on costs specialization and trade assesses current costs and productivity and presents new information on how increased exports and specialization would affect cost performance and international competitiveness examines non production costs and other non cost influences on specialization and export performance and suggests strategies for the private sector to consider in order to survive in the changing trade environment of the 1980s
